THE OCEAN BEACH NEWS

NRA MEMBER U.S. WE DO OUR PART

A Booster for Ocean Beach, Point Loma, Mission Bay and Mission Beach

TWELFTH YEAR, No. 34 | OCEAN BEACH CALIFORNIA | FRIDAY, JUNE 22, 1934 | PHONE, BAYVIEW 0741 | FIVE CENTS THE COPY

Hundreds Are Expected Here For Old Timers Barbecue

Young and Old Invited---Come and Bring The Children for a Good Time

Enthusiasm is growing, plans are developing, and Ocean Beach, it is believed, will enjoy a gala celebration on the afternoon and evening of June 30th when an Old Timers Barbecue dinner will be featured with the whole afternoon taken up in beach and sports program, then the Barbecue at 6 p. m., and a program in the old merry-go-round building with Col D. C. Collier master of ceremonies. A huge bonfire will complete the entertainment except for a street dance with music by a genuine Hill-Billy orchestra.

A meeting of committees has been held each Friday night. At the last session James Murphy of Old Town was present and gave particulars as to what was needed for the barbecue according to the number of people present.

A reservation committee was appointed to and will make reservations for any organization or group who wish to be seated together. The Barbecue dinner will be 25c with barbecued meat, spaghetti, cold slaw, pie, coffee, bread and butter, to be served. A nominal charge and every person who cares to come will be welcomed. The pioneers and old timers will be seated in preferential manner so they may hear the evening's speaker and enjoy the program. All those who are interested should come out and let's see if we cannot make this a real celebration and an annual affair at Ocean Beach. The reservation committee include Mrs. C. W. Varney, phone BV 0758-J; Mrs. Amy Cunningham, phone BV 0529; Mrs. H. Eulberg, BV 0746-W; and Mrs. C. F. Near, phone BV 1006.

Old style bathing suits are wanted by the committee on costumes for the Barbecue advertising. The older the better. Please call Mrs. H. Eulberg, phone BV 0476-W.

Ocean Beach Woman's Club Install New Officers

The Ocean Beach Woman's club in their meeting on Thursday last week recited history of the past year's activities and inducted into office the newly elected officers.

Mrs. Margaret Reinfrank, past president, acting as installing officer for the following: Mrs. Stanley Burne, president (re-elected); Mrs. Hyda Cook and Mrs. Kathryn Gray Santry, vice presidents; Mrs. Mary Lee, secretary; Mrs. Edythe Kenline, corresponding secretary; Mrs. Ida T. White, treasurer; Mrs. L. B. Hayward, auditor; Mrs. Eugenie Sterne, historian, and Mrs. Carrie Mason parliamentarian.

The president, in speaking of the year's accomplishments, stressed the purchase of a clubhouse lot.

Mrs. Eugenie Sterne, historian, in reviewing the club year, credited Mrs. Albert Dumont, civics chairman, with getting government provision for a local playground, and stressed the department's cooperation with other local civic bodies in securing appropriation for a new elementary school building, and a recreation center.

Mrs. Eva Demarest presented Melva and Jane Dennis and Joyce and Janice Demarest, from Point Loma High school, in two quartet numbers. She accompanied the girls, and sang two solos.

A garden tea at the home of Mrs. W. S. Harris, June 26, was announced.

Cooperation of the club in the Pioneer Barbecue to be given June 30 was stressed. Mrs. W. S. Harris being chairman of the afternoon's program.

Mrs. Olive Kline, chairman of the day, was assisted as hostess by Mrs. C. W. Varney and Mrs. Bessie Harrison.

KIWANIS INTERNATIONAL

Ocean Beach Kiwanis met Wednesday noon at Ocean Village cafe with Dr. Alderson of La Jolla as first order of business introducing the "Come-and-get-me-cup".

Ed Wickern was chairman of the day with Richard Low as guest speaker. The gentleman, born of Chinese parents in the U. S., told of the steady awakening of China to modern affairs. He said the lack of transportation and comunication made progress very slow; that approximately 80 per cent of the people can neither read or write, and that in the area just a little larger than the whole United States is only 10,000 miles of railroads and no highways of consequence.

The student and scholar in China stands highest in respect of the people and the soldier the lowest. In Pekin the Gazette was printed on yellow silk before the discovery of movable type by Guttenberg in Europe. Great extremes of class are known, the rich being extremely so and the poor not enjoying one good full meal in a whole life time.

Mr. Low touched on the Japanese problem and said that the 80 million Nipponese were at present stronger than the 430 million Chinese, but that times will change, necessarily slow on account of the illiteracy of the people, but that headway is being made with schools copied after those of the U. S. and many Chinese students receiving training in this country.

Plans are being made for an inter-club meeting at La Jolla Friday, July 6th, owing to 4th being the local club's regular meeting day.

CAMERA COURSE TO BE GIVEN

A practical extension course in photography will again be offered by State College this summer. The course will be given at the Visual Instruction center in Balboa park by J. H. House, a well known photographer of many years experience. The first class will meet June 26 and the course will continue to August 3. College credit may be had if desired.

Instruction will be given in the efficient use of all types of kodaks and cameras, both still and motion picture. Class sessions will be devoted to the study of fundamentals of elementary photochemistry, photographic optics, history and development of photography and orthochromatics. A considerable amount of time will be given to actual labatory work in developing, printing, enlarging and lantern slide making. Field excursions will be made where instruction will be given in the efficient use of cameras, exposure, value of light, and composition.

Descriptive literature covering this and other extension courses, to be given in Balboa park this summer, may be had at any of the park institutions. Further information regarding the summer course may be had by calling Main 5918.

Ocean Beach horse shoe pitchers went to Balboa park Monday for a return match with that group. They fared a good deal better than when playing at home and are reported to have won 27 sets out of 70 played. The boys are still suffering some stage fright but with constant practice and more competition expect to soon show our neighbors a real contest.

XXXIV

CARLSON DEMANDS REDRESS

Continuing the quotation of the article "Billy is Boiling," there is a laugh for old-timers in the following:

"Naturally he (Carlson wanted to know his legal standing in the matter and see if the rights of the company had been infringed upon. After some search he concluded that he had the right in the matter and accordingly sent the following letter to the resident agent of the steamship company, Frank Simpson:

'San Diego, Cal. Apr. 23, 1890
Pacific Coast Steamship Company....

You are hereby notified to relay the rails and fittings taken by you from our roadbed within five days from the date hereof, and also to pay us $5000 for the further damage incurred by said destruction of over a half mile of our railroad by you, or you will be proceeded against under the laws of this state for unlawfully taking property not belonging to you, and removing a portion of our railroad track, and also for $50,000 damages caused by such unlawful acts.

(Signed) Los Angeles, San Diego and Yuma R. R. Co.
H. G. Merrill, Asst. Sec.'

"A copy of the same was sent to the San Francisco office of the company, and when Carlson was seen last night on the subject he stated that the letter meant just what it said, and that the tone of the letter was just what he intended it should express, and that it would be pushed before the courts unless something was done in accordance with the notice."

Whether anything was ever done "in accordance with the notice" does not appear from subsequent newspaper notes. The next Carlson news concerns Billy's flourishing a telegram from the railroad magnate C. P. Huntington, saying that he might come to San Diego. Then comes the announcement that Huntington has gone east; with the astonishing follow-up on May 20th:

"Mr. Huntington has come and gone....a matter of surprise and disappointment to some people that the president of the Southern Pacific did not station himself upon a prominent street corner and drum up a crowd and impart to them the intentions, with plans and specifications, for a new railway line....A Southern Pacific engineer will be sent to San Diego immediately to survey a route to Yuma. Upon the report of this survey being made Mr. Huntington will submit a proposition to build a railroad from San Diego to Yuma...."

And from all appearances at this distance that road had its beginnings —in W. H. Carlson's plans at least —at Ocean Beach, the Ocean Beach of his dreams.

In the same issue of the Union is this sad commentary, however:

"Carlson was not among the delegates who went to the observation car as the train (with C. P. Huntington aboard) drew into the station at 5 p. m..... Shorn of his smile, which before now was stouter than his Roseville Ocean Beach-bound) rails, Carlson stood in gloom.... Within was the man whom he had given people to understand would have something of interest to say about railroads when he should come...." And Billy was not even invited to meet the magnate!

Next week--
STRAW RIDES TO THE BEACH

PLAYGROUND NEWS

Summer handiwork classes for children will begin, at the recreation building, Monday, June 25th, from 10 until 12 a. m. Monday—leather work, Tuesday—basketry work, Wednesday—wood work, Friday—sewing.

Mrs. Bodmer will supervise the Mission bay play grounds from 1 until 5 o'clock daily except Sunday.

Musings About Things Interesting To You and Me

(BY THE EDITOR)

☞James Murphy, who is to barbecue the beef at the Old Timers celebration at Ocean Beach, June 30th, says when the citizens met to celebrate the completion of the paving of streets, he fed 20,000 people, barbecued 5600 pounds of beef in a pit 80 feet long, and that he still has a vivid memory of the great crowd.

☞Did you know that in 1908 Ocean Beach had only thirteen houses with no school here at that time? The first school was started in 1910. In 1908 there were only two children living here. They were Warren and Charlotte Thomas.

☞Last week more than 500 extras of the Ocean Beach News were sold, and this week, one party at Oakland, California, is taking 100 copies. The demand is for the Christian Science lecture in this issue, but we are especially pleased to send out these extra papers, for it all helps in putting Ocean Beach on the map.

AMERICAN LEGION

AMERICAN LEGION AUXILIARY NOTES Unit No. 433

The post and auxiliary and their families held a most delightful picnic on the beach Thursday of this week. A basket supper was served with hot coffee furnished by the auxiliary, committee in charge of refreshments being Louise Eulberg and Edith Steele.

The next meeting of the year will be on Friday, July 6. This is the most important meeting of the whole year and every member should be present without fail, as officers for the coming year are to be both nominated and elected, also delegates to the states convention. An unusually pleasant time has been planned for the social hour following the meeting, committee in charge Elizabeth Finley and Grace Chadwick.

Our exchange bazaar continues to be open Thursday afternoons from 2 to 5. Come in and see.

The regular meeting of the junior auxiliary was held Thursday of this week with an interesting business meeting and social hour. All girls whose parents are members of the American Legion post or auxiliary are eligible to membership.

OCEAN BEACH PEOPLE ENROLL FOR MAIL STUDY

"Study-by-Mail" courses most popular with residents of Ocean Beach, enrolling recently with the University of California extension division, are Shakespeare, differential calculus, business management and intermediate Spanish.

So Professor Leon J. Richardson, University extension head announced this week following a survey of the instruction taken by adults in various sections of the state.

Correspondence instruction was first given by the State University in 1913 with a limited number of courses. This year 172 different courses are offered and provision has been made for more than 5,000 enrollments. Last year 25,834 lesson papers were corrected and criticized and almost 100 persons were engaged in the work of instruction.

Courses most popular in San Diego county include English, mathematics, economics and languages.

Persons desiring bulletins containing complete descriptions of the courses are asked to write to University of California Extension Division, 301 California Hall, Berkeley. Enrollments may be made at any time of the year.

New courses made available include radio communication, reading and composition, interior decoration, history of Western Europe, history of the Pacific Coast, journalism, verse writing and the English Bible.

Old School Building Being Torn Down

Insurance of construction of a new elementary school building at Ocean Beach now seems assured for tnis week the Whiting-Mead company started wrecking the main part of the old structure, that L part on the corner of Santa Monica avenue and Sunset Cliffs Blvd. A large force of men are at work and it will take but a short time to get the old building out of the way.

Stanley Burne spent three days in Los Angeles last week in behalf of a settlement for the demolition of the structure.

Next Monday evening, June 25th, has been set as the time when the San Diego city school board will award the contract for the new building which local people hope will include a fair sized auditorium.

Allen The World Traveler On Another Long Trip

A. J. Allen 4871 Newport Ave., accompanied by Mrs. Elizabeth J. Hanna and Mrs. Nellie May Thompson leave June 23rd for a 10,000 mile trip. This is Mr. Allen's 16th trip across the continent. He has also made 37 trips across the Atlantic, 18 times to Egypt and 3 times around the world. On this trip they will make many side trips. The first will be the Boulder Dam, then that wonderful park called Zion National, then to Bryce Canyon National Park. This is an amazing entrancing spectacle of matchless beauty.

This will be Mr. Allen's fourth trip to this park and to look and listen to what some of the strangers say about this strange setting of God's Kingdom. The scene changes and then appears a panorama never to be forgotten and we hear such names as the Three Wise Men; Temple of the Sun; Altar of Sacrifice and Angel's Landing. Each a blaze of brilliant color, the pale pink to deep red and The Great White Throne where the foot of man has never trod.

Then Salt Lake City and on the Lincoln Highway to Holdrege, Neb., and the World's Fair in Chicago. Then Pittsburg Syracuse, Montreal, Quebec, Boston, Massachusetts, New York, Washington, D. C., Richmond, Virginia, Charleston, Savannah, Jacksonville, Mobile, New Orleans, Houston, San Antonio, The Carlsbad Caves, New Mexico, Phoenix, Yuma, El Centro, and San Diego.

CHRISTIAN SCIENCE CHURCHES

"Is the Universe, including Man, Evolved by Atomic Force?" This question is the subject of the Lesson-Sermon on Sunday in all Churches of Christ, Scientist, branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. The Golden Text is from Paul's first epistle to the Corinthians: "To us there is but one God, the Father, of whom are all things, and we in him."

Among the Bible selections in the Lesson-Sermon are the verses from Genesis: "And God said, Let there be light: and there was light. And God saw the light, that it was good: and God divided the light from the darkness. And God called the light Day, and the darkness he called Night. And the evening and the morning were the first day."

Correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, present the statements: "God, Spirit, dwelling in infinite light and harmony from which emanates the true idea, is never reflected by aught but the good." "'Let there be light,' is the perpetual demand of Truth and Love, changing chaos into order and discord into the music of the spheres."

NEW ARRIVALS

June 13th a son was born to Mr. and Mrs. Harold E. Harper of 4751 Narragansett avenue at Scripps Memorial Hospital.

June 12th to Mr. and Mrs. Vincent A. Whelan of 4406 Santa Monica Ave a son at Mercy hospital.

June 10th to Mr. and Mrs. Ralph R. Quainton of 4479A Cape May Ave. a daughter.

A son June 14th to Mr. and Mrs. George F. Northern of 4650 Lotus street, at Paradise Valley hospital.

Funeral Former Immigration Officer Today

Funeral services will be held today at 2 p. m., Friday, June 22nd, at the chapel of Bonham Bros., mortuary, Fourth avenue and Elm street, for Samuel D. Dodds of 4935 W. Point Loma Blvd., a resident here for the past seven years. Mr. Dodds has been at Mercy hospital for the past month suffering from an illness which the doctors seemed to find impossible to diagnose and treat with any success. He passed away Wednesday morning at 5 a. m. leaving to mourn his loss his widow Lillian E. Dodds, who has the heartfelt sympathy of a large number of friends. He was the brother of Mrs. M. Scherff, Mrs. J. J. Terry, Mrs. Adele Seeger, Miss Elizabeth Dodds, all of Peoria, Ill., and Frank A. Dodds of Buffalo, N. Y., age 55 years, a member of Bennington Camp No. 20, U. S. W. V., who will have charge of the funeral services.

Samuel D. Dodds was a native of Illinois, and served in the Spanish-American war, a sergeant in Co. K, 35th infantry, also in the U. S. government immigration service for 27 years, most of that time in New York, Texas and New Mexico. Upon his retirement seven years ago he built a home and located in Ocean Beach, together with Mrs. Dodds.

CELEBRATE THEIR GOLDEN WEDDING AT OCEAN BEACH

(Tuesday Union)

Mr. and Mrs. F. H. Norris, 4420 Brighton ave., Ocean Beach, were guests of honor yesterday at an open house in celebration of their golden wedding anniversary and became Union True Vow button wearers. Their son, Capt. Fred H. Norris, retired, and his wife planned the celebration, to which neighbors and friends were invited. Many called to greet Mr. and Mrs. Norris.

Married in Denver June 18, 1884, Mr. and Mrs. Norris went to Minneapolis where they resided 43 years. Mr. Norris was in the grocery business until he retired a few years ago. He is a native of Vermont. Mrs. Norris was born in Iowa.

There are five sons and four grandsons. The sons are Arthur B. Seattle; Frank W. and Leslie H. Minneapolis; Capt. Fred H., Ocean Beach; Homer E., New York City.

"Ours has been an uneventful life," said Mrs. Norris.

"They say their lives were uneventful," said the son. "They have five sons, experienced depressions worse than the one everybody is talking about now, and went thru a couple of wars."

BAPTIST CHURCH SERVICES

Rev. W. S. Dunn will preach next Sunday morning at 11 o'clock. His sermon theme will be "Morning and Evening". The service of song will be at 7:30 p. m. at which time the pastor will speak on the subject "Disregarding Signals". The Young People's society meets at 6:30 p. m and is ably led by their counsellor Mrs. Ruth Bailey. The young people of the community are invited to these meetings, and to the splendid social times that the society enjoys.

You will receive a cordial welcome at all of the services of this church.

DISTRICT COUNCIL MEET ASSEMBLIES OF GOD

All day fellowship meeting of the San Diego-Imperial Valley section of the Southern California-Arizona district council of the Assemblies of God will be held at Elim Pentecostal tabernacle, Cape May avenue and Ebers street, Ocean Beach, Monday June 25.

With the blessed remembrance of our last fellowship we invite you to come. Speakers (DV) will be District Superintendent A. G. Osterberg, Ben Hardin, pastor Full Gospel tabernacle San Diego, and others.

Featured with the music and singing will be solos by Einar Waermo and others.

A cordial welcome to all.

News Review of Current Events the World Over

President's Memorial Day Address at Gettysburg—Major Labor Disputes Trouble Administration—Attempt to Assassinate Ambassador Caffery in Havana.

By EDWARD W. PICKARD

© by Western Newspaper Union.

BEFORE a vast multitude of persons gathered at Gettysburg battlefield President Roosevelt delivered a Memorial day address that was in effect a vigorous attack on critics of his plans for national recovery. Introduced by Governor Pinchot as "the first citizen of the world," Mr. Roosevelt first paid eloquent tribute to the men of the North and South who fought bravely on that historic field, and described how the sections of the nation had been welded into one, its unity being aided by foreign wars, until now all sectionalism has disappeared. He continued:

President Roosevelt

"We are all brothers now in a new understanding. The grain farmers of the West do not set themselves up for preference if we seek at the same time to help the cotton farmers of the South; nor do the tobacco growers complain of discrimination if, at the same time, we help the cattle men of the plains and mountains.

"In our planning to lift industry to normal prosperity the farmer upholds our efforts. And as we give the farmer a long sought equality the city worker understands and helps. All of us share in whatever good comes to the average man. We know that we all have a stake—a partnership in the government of our country.

"Today we have many means of knowing each other—means that have sounded the doom of sectionalism. It is, I think, as I survey the picture from every angle, a simple fact that the chief hindrance to progress comes from three elements which, thank God, grow less in importance with the growth of a clearer understanding of our purposes on the part of the overwhelming majority.

"These groups are those who seek to stir up political animosity or to build political advantage by the distortion of facts; those who, by declining to follow the rules of the game, seek to gain an unfair advantage over those who live up to the rules; and those few who still, because they have never been willing to take an interest in their fellow Americans, dwell inside of their own narrow spheres and still represent the selfishness of sectionalism which has no place in our national life."

GOING from Gettysburg to New York, the President embarked on the cruiser Indianapolis, put out to sea and reviewed the American fleet, which, as assistant secretary of the navy, he helped to command during the World war and in which he maintains the warmest interest. With him were Secretary Swanson and Josephus Daniels, the war time navy secretary. There were some other distinguished guests, but members of congress tried in vain to get aboard.

The Indianapolis was anchored about a mile from Ambrose lightship, and 88 fighting ships passed proudly in review. The Pennsylvania, flying the four-starred flag of Admiral David A. Sellers, commander of the fleet, led the parade and then, with the Louisville, turned out of line and anchored near the Indianapolis. It was an imposing spectacle, such as had not been witnessed since the early days of President Coolidge's administration.

AT THE annual exercises at the United States Naval academy 463 midshipmen were graduated. A total of 332 were commissioned ensigns in the navy, 25 lieutenants in the marine corps, one lieutenant in the Philippine scouts and 105 will resign.

UNDER the present administration the navy is doing quite well, but the army feels that it is neglected. Secretary of War Dern and Newton D. Baker, who held the portfolio during the war, appeared before the house military affairs committee and urged the passage of the Thompson bill, which would increase the strength of the army to 165,000 enlisted men and 14,063 officers. That the present regular army is inadequate in the face of present disturbed world conditions was declared by both gentlemen.

The American army as now manned would not simultaneously protect our outlying possessions, train civilians, and repel "any sudden invaders," Secretary Dern insisted. A more satisfactory army would cost the nation $35,000,000 annually, he said in explaining that he had not suggested an increase to President Roosevelt because of the President's desire to balance the budget.

"With the rest of the world armed to death, I don't see how we can afford to be disarmed," Mr. Dern told the committee.

Our present army has but 118,000 men and 10,000 officers.

Mr. Baker could not "imagine an army less than five times the present size of ours having the slightest effect on the military policy of any other nation." Of course, he did not advocate any such increase; he said four divisions, one in each section of the country, with a fifth free to train civilians, would suffice.

THOUGH administration leaders have asserted that labor troubles are to be expected in a time of recovery and that they are not alarmed by the strikes that are now in effect or are threatened for the near future, it was evident in Washington that these optimists were disturbed by the prospect of general strikes in the cotton textile and steel industries. It was believed President Roosevelt would have to intervene in the effort to bring about peace. Frequent conferences of officials were without result.

As General Johnson refused to change the order permitting cotton mills to reduce their output by 25 per cent for twelve weeks, the United Textile Workers of America summoned all cotton mill employees to quit their machines, and it was predicted that 300,000 would respond. The workers claim the reduction would amount to 25 per cent cut in their wages, and say they will not stand for this. They also demand a 30-hour week with no reduction of pay.

Fighting for recognition of non-company unions, a point on which the steel masters will not yield, the Amalgamated Association of Iron, Steel and Tin Workers announced that a general strike would be called in mid-June unless its members win the right to choose spokesmen freely for collective bargaining.

The union leaders, who contend the collective bargaining guaranty in the NRA has been violated by employers, asked:

"Is the American Iron and Steel institute more powerful than the President of the United States?"

ENDEAVORING to learn what small business throughout the country thinks about the NRA, the national industrial conference board has been conducting a survey that has not brought definite results. Tabulating these results as best it can, the board states it found that 34.4 per cent favored the NRA as a whole; another 12.8 per cent favored it with some reservations; 36 per cent were definitely opposed to it, while 6.4 per cent could not see that it made much difference.

CUBA is now entirely freed from United States suzerainty, through a treaty which was signed at the State department by plenipotentiaries of both countries and ratified by the senate. The pact abrogates the Platt amendment providing for the maintenance of the independence and territorial and financial integrity of the island republic and authorizing the United States to intervene therein for the protection of the country and the preservation of order. In the new treaty the United States retains the lease of Guantanamo as a naval base.

The people of Cuba rejoiced exceedingly over the abrogation of the Platt amendment, and President Mendieta declared a three days national holiday.

HAVANA police learned that there was a plot to assassinate Jefferson Caffery, American ambassador to Cuba, and to destroy American property on the island. They took extraordinary precautions to protect Mr. Caffery, but despite the presence of soldiers at the entrance to his home some unidentified assailants drove by in a car and poured a stream of bullets from sawed-off shotguns just at the time Mr. Caffery usually leaves for the yacht club. He was not injured but one of the soldiers was grievously wounded, his right leg being torn off by an explosive bullet. Mr. Caffery went on to the yacht club calmly and refused to say who he thought the assassins might be.

J. Caffery

Cuban government officials were greatly excited by the attempt on the ambassador's life, and there was an inclination to blame the Communists, but leaders of that party denied their followers had anything to do with it. In recent demonstrations the radicals have attacked Mr. Caffery in their speeches. Presumably the sole purpose is to stir up trouble between the governments of the United States and Cuba.

DELEGATES from the five New England states, New York and Pennsylvania have signed a solemn pact for the protection of women and minors in industry, which has been under negotiation for several years.

The compact, which must be ratified by the legislatures of the several states, contemplates minimum standards of wages for women and minors and contains a provision that "no employer shall pay a woman or a minor an unfair or oppressive wage." State boards are to be set up with authority to investigate pay rolls and require compliance.

CHARGES are made by the house agriculture committee that joint stock land banks have been using federal funds made available under the 1933 farm loan act to buy in their own bonds at 35 cents on the dollar while pressing foreclosures on their debtors.

The committee approved the Fulmer bill to authorize farmers who have obtained loans from joint stock land banks to buy on the open market joint stock land bank bonds, tendering same to the joint stock land banks in payment of their indebtedness. The bill would also enable farmers to repurchase their lands that have been previously foreclosed if said lands are still in the possession of these banks.

STATESMEN from many nations met in Geneva and reopened the sessions of the disarmament conference, with a full realization of the fact that their failure may mean the renewal of war in Europe in the not far future, and possibly the end of the League of Nations. Such hope as they had of breaking the impasse seemed to rest on the plan which Foreign Commissar Litvinov of Russia said he was ready to offer. It was believed he would concentrate on a policy of political security as a basis for disarmament. Norman H. Davis, American ambassador-at-large, presented the views of President Roosevelt, urging an accord emphasizing supervision of arms and a more rigid control of the international traffic in arms.

Louis Barthou, foreign minister of France, showed no inclination to yield to the German demands for rearmament. The French are said to believe Hitler is due soon to run up against domestic troubles that will tie his hands; they will continue to promote their defensive alliances until the German chancellor gives in, and just now are counting on a pact of mutual assistance with Russia and the little entente which will be signed if, as expected, Russia enters the League of Nations.

Premier Mussolini of Italy, in a speech before the chamber of deputies, said that disarmament talk was foolish and in so many words suggested that war was the only way out of the economic adversities that beset Italy and Europe generally.

THE Irish Free State took another step toward becoming a republic when the dail eireann passed a bill abolishing the senate. After this action had been taken President Eamon de Valera said: "We want England to get out. We do not want to have anything to do with Britain. If there is to be any form of association, it must be in the common interest of both. We must be the judges of whether it is to our advantage or not."

Eamon de Valera

No definite plan was mentioned, and none is expected to be put forward before March, 1935, when abolition of the senate will become effective. Until that date any action of the dail would have to have senate approval.

EXEMPTION of the service industries from some of the fair trade practices of NRA codes was authorized by President Roosevelt in an executive order. The exemption does not apply to minimum wages and maximum working hours, child labor or collective bargaining. The order empowers Administrator Johnson to cease attempting to enforce open price systems, price fixing and other devices on hundreds of thousands of cleaners, dyers and pressers, barber shops, beauty shops and the like.

Mr. Roosevelt in his statement said that "a trial period of some months has shown that, while most industries, after organization for this work and a little experience with it, can secure uniform national results, there are others in which a greater degree of autonomous local self-government is desirable." Among these are "some but not all" of the service industries, the statement added.

Enforcement of the cleaners and dyers' code has been especially troublesome, accounting for more than half of the blue eagle removals.

Under the executive order, fair trade practice provisions for a service industry in a given area may be provided when 85 per cent of the industry in the area agrees to them and they are approved by the NRA.

PRESIDENT ROOSEVELT signed the joint resolution of congress empowering him to stop arms shipments destined for countries at war, and immediately proclaimed an embargo against shipments of arms or munitions from the United States to Bolivia and Paraguay. His action was the first of its kind in American history. Because of existing treaties he could not forbid actual shipment of arms but he did prohibit their sale in the United States to the warring countries.

Costa Durels, Bolivian representative in Geneva, before an open session of the League of Nations council invoked Article 13, the arbitration clause of the league covenant, as a basis for settling the conflict with Paraguay. If his demand is granted the dispute will automatically go to the World's Court of Permanent Justice for settlement. Durels said an arms embargo would mean the "finish" of Bolivia.

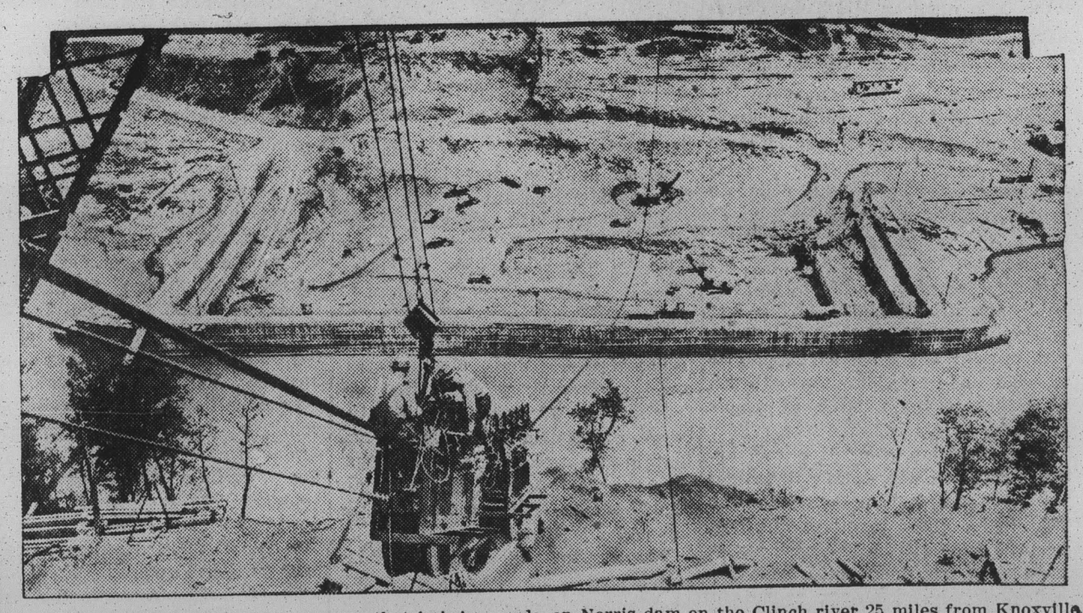

CODOS and Rossi, French flyers who hold the distance record, sought to better their mark by making a non-stop flight from Paris to California. They got across the Atlantic ocean all right, but a weakness of one wing of their big monoplane developed and they were forced to land at New York.

Battling With New York's Unemployed

This luckless demonstrator feels the weight of a policeman's night stick while female comrades, shouting wildly, grab his coattails and endeavor to pull him out of danger. He was one of the 1,000 unemployed who staged a pitched battle with police in front of the department of public welfare offices in New York City.

Work on Norris Dam Is Progressing Well

This photograph shows the progress that is being made on Norris dam on the Clinch river 25 miles from Knoxville, Tenn. Excavation work in the first coffer dam, plainly visible, is nearly finished. Preparations were being made to pour the concrete which will be carried to its proper place in dump buckets attached to the cableway pulleys shown in the foreground.

Hawaiian Heiress Weds a Lawyer

Juliet Magoon, Honolulu heiress and daughter of the first white family to settle in Honolulu, is the bride of Joseph L. Fainer, Los Angeles attorney, and the honeymooners are pictured here on the liner Malolo after an elaborate wedding at "Magoon Castle" on the slopes of Diamond Head, the extinct crater that overlooks Honolulu.

Coast Guard Is Getting Planes

WINS BRITISH TITLE

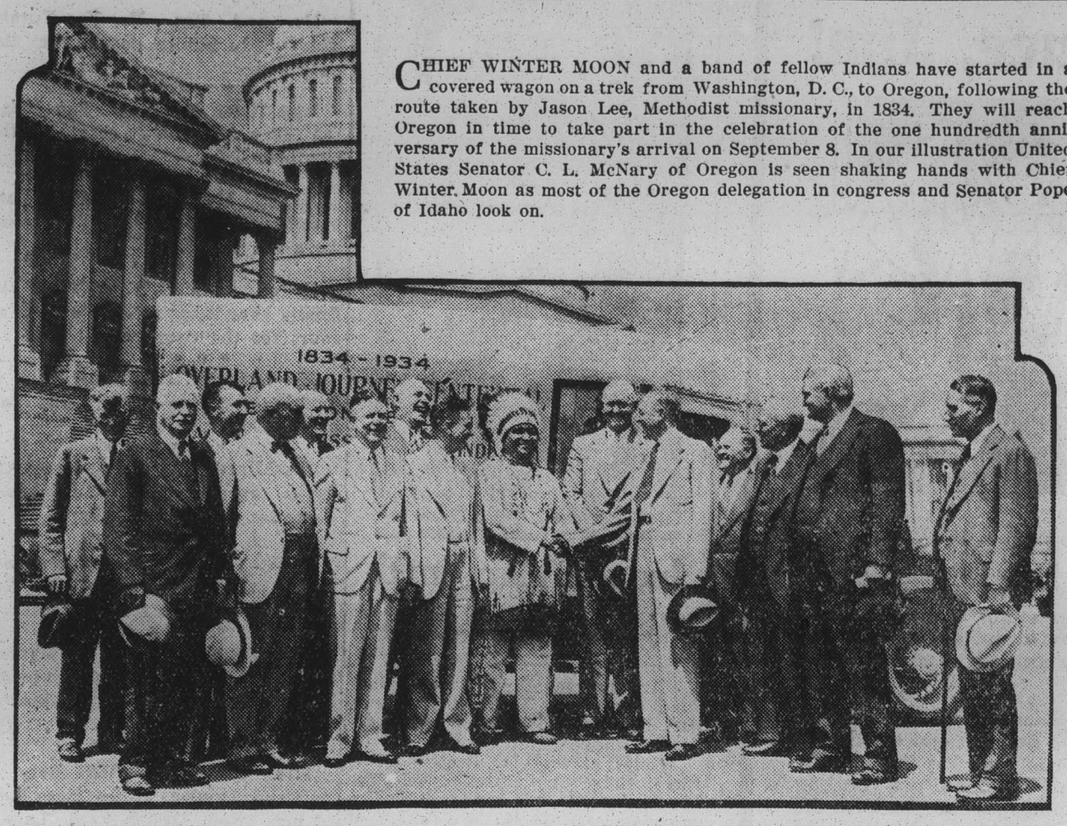

W. Lawson Little of California captured the British amateur golf title in the tournament at Prestwick, Scotland. In the final round he defeated Jimmy Wallace of Scotland by a display of astonishing golf. He is only twenty-three years old and is a student in Stanford university.

PREMIER OF POLAND

Prof. Leon Kozlowski, who has been serving as vice minister of finance, has been appointed premier of Poland.

Indians Start Wagon Trek Across the Continent

CHIEF WINTER MOON and a band of fellow Indians have started in a covered wagon on a trek from Washington, D. C., to Oregon, following the route taken by Jason Lee, Methodist missionary, in 1834. They will reach Oregon in time to take part in the celebration of the one hundredth anniversary of the missionary's arrival on September 8. In our illustration United States Senator C. L. McNary of Oregon is seen shaking hands with Chief Winter Moon as most of the Oregon delegation in congress and Senator Pope of Idaho look on.

BEDTIME STORY FOR CHILDREN

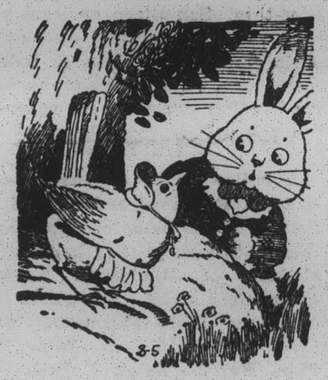

By THORNTON W. BURGESS

MORE TROUBLE FROM SALLY SLY

A FEW mornings after his talk with Jenny Wren about Redeye the Vireo, Peter once more visited the Old Orchard. No sooner did he come in sight than Jenny Wren's tongue began to fly. "What did I tell you, Peter Rabbit? What did I tell you? I knew it was so, and it is!" cried Jenny.

"What is so?" asked Peter rather testily, for he hadn't the least idea what Jenny Wren was talking about.

"Sally Sly did lay an egg in Redeye's nest, and now it has hatched, and I don't know whatever is to become of Redeye's own children. It's perfectly

"What Did I Tell You, Peter Rabbit? What Did I Tell You?"

scandalous," cried Jenny, and hopped about and jerked her tail and worked herself into a small brown fury.

"The Redeyes are working themselves to feathers and bone feeding that ugly young cowbird, while their own babies aren't getting half enough to eat," she continued. "One of them has died already. He was kicked out of the nest by that young brute."

"How dreadful!" cried Peter. "If he does things like that I should think the Redeyes would throw him out of the nest."

"They're too soft-hearted," said Jenny. "I can tell you I wouldn't be so soft-hearted. No, siree, I wouldn't! But they say it isn't his fault that he's there, that he's nothing but a helpless baby, so they just must take care of him."

"Then why don't they feed their own babies first and give him what's left?" asked Peter.

"Because he's twice as big as any of their own babies and so strong and greedy that he simply snatches the food out of the very mouths of the others. Because he gets most of the food he is growing twice as fast as they are. I wouldn't be surprised if he kicks all the rest of them out before he gets through. Mr. and Mrs. Redeye are dreadfully distressed about it, but they will feed him, because they say it isn't his fault. It's a dreadful affair, and the talk of the whole orchard. I suppose his mother is gadding about somewhere, having a good time and not caring a flip of her tail feathers what becomes of him. I believe in being good hearted. I certainly do. But there is such a thing as overdoing the matter. Thank goodness I'm not so weak minded that I can be imposed on in such a way as that."

"That may be so," replied Peter, "but just the same I can't help feeling a lot of respect for Mr. and Mrs. Redeye because of their kind heartedness."

Chic Ensemble

Patent leather flowers in black, white and yellow, dictate the colors of the print dress in this ensemble with a black wool coat.—From Bergdorf Goodman.

Mother's Cook Book

PALATABLE PUDDINGS

DURING the warm months more delicate puddings of fruit and eggs in the form of souffles are much enjoyed.

Lemon Souffle.

Beat the yolks of four eggs until thick and lemon colored, add one cup of sugar very slowly and continue beating, then add the grated rind and juice of a lemon. Cut and fold in the whites of four eggs beaten stiff and turn into a buttered baking dish; set in a pan of hot water. Bake 35 minutes. Serve without sauce.

Spanish Souffle.

Melt one-fourth of a cupful of butter, add one-half cup of stale bread crumbs, cook until slightly browned, stirring often; add one cup of milk, two tablespoons of sugar, cook 20 minutes in a double boiler; remove from the fire, add the unbeaten yolks of three eggs and cut and fold in the stiffly beaten whites. Add flavor and bake as any souffle.

Steamed Blueberry Pudding.

Mix and sift together two cupfuls of flour, four teaspoons of baking powder, and one-half teaspoon of salt. Add one cup each of milk and blueberries rolled in flour, turn into a buttered mold and steam one and one-half hours. Serve with a creamy sauce or sugar and cream.

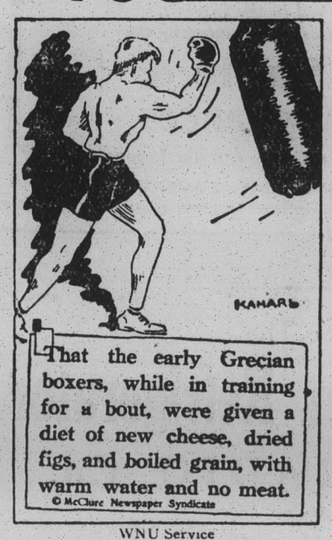

Graham Pudding.

Melt one-fourth of a cup of butter, add one-half cup of molasses, one-half cup of milk and a well-beaten egg. Mix together one and one-half cups of graham flour, one-half teaspoon of soda, one teaspoon of salt, and one cupful of seeded raisins cut fine. Turn into a buttered mold, cover and steam two and one-half hours. Serve with any fruit sauce. Dates or figs may be used in place of the raisins for variety.

A sauce to serve on angel food makes a most tasty pudding prepared thus: Cream one-third of a cup of butter, add one cup of powdered sugar very slowly, one egg white beaten stiff and two-thirds of a cup of mashed strawberries. Beat until well blended then add with whipped cream for a garnish.

QUESTION BOX

By ED WYNN . . . The Perfect Fool

Dear Mr. Wynn:

What is your opinion of married life, don't you think it is the happiest life?

Sincerely,
MAY DENN.

Answer—It all depends how the two people enjoy themselves.

Dear Mr. Wynn:

Do you think it is safe for a man to shave his face with a dull razor blade?

Yours truly,
BOB BURR.

Answer—Sure I do. As long as the handle of the razor doesn't break, the beard is bound to come off.

Dear Mr. Wynn:

Yesterday, a tramp came to my back door and asked for something to eat. I gave him a meal on his promise to cut the lawn. He ate the meal but he ran away and never kept his promise to cut the lawn. What do you think of that?

Yours truly,
I. FEAL ORFUL.

Answer—It just goes to show that you must never take the word of a total stranger.

Dear Mr. Wynn:

My sweetheart and I are going on a hike next Sunday. We intend walking cross country. My girl weighs 197½ lbs. What I want to know is this: When we come to a fence, is it my place to "help" her over the fence?

Truly yours,
P. DESTRIAN.

Answer—My dear boy, as your girl weighs nearly 200 pounds, it is your place to "help" the fence.

Dear Mr. Wynn:

A friend of mine says he knows a pair of twin girls that, whatever you tell them, must be told to them together. Why is that?

Yours truly,
RAY D. OHE.

Answer—That is because the twins look so much alike, they can't be told apart.

Benedict Arnold Scorned

After he betrayed his country, Benedict Arnold was commissioned a brigadier general of the British army and was awarded an amount of 6,315 pounds as compensation for his property losses. He led an expedition in Virginia and in New London. After the war he engaged in outfitting privateers. He was the object of scorn and neglect in England and died in London June 14, 1801.

A CORNER IN MY HEART

By ANNE CAMPBELL

YOU have a little corner in my heart,
A sunny space belonging just to you,
With windows open so the gentle art
Of brown wrens singing may come drifting through.
There is a garden, and the fragrance drifts
Into the little corner where you are.
And in the evening palest moonlight sifts
In my glad heart, and there's an evening star.

Now you are gone, the sun no longer shines.
The garden flowers are dead, the moon no more
Looks down in splendor through the trumpet vines.
The star is absent from my heart's wrenched door.
A little corner of my heart is dull
And dusty that you made so beautiful!

Question of Nutrition Needs

Regardless of Conflicting Reports, One Fact Stands Out, That Vitamins Are Absolutely Necessary in the Diet; Easy to Obtain.

Every once in a while the science of nutrition seems too puzzling and complicated for the everyday person to understand. When doctors (and research workers) disagree, what is left for the man in the street to do but to hold up his hands in bewilderment?

Recently, in the same edition of a daily newspaper, on one page, appeared headlines quoting a statement by a famous nutritionist that people were vitamin crazy—that they were paying entirely too much attention to this in choosing their diet. On the next page was a quotation from another equally famous nutritionist stating that as a people, we were on the verge of vitamin starvation.

If we went further and read the text of the first statement we found, however, that the first authority had not discounted the fact that vitamins were necessary. He offered the information that it was possible to get most of these by the drug-store route by means of concentrated cod-liver oil for A and D, wheat germ or yeast for B, and by concentrating on one food source, such as oranges, for C. Somehow, it seems to me a more sane and orderly proceeding to choose in practice a varied diet which will provide us without too much special thought, the vitamin supply which both authorities agree we need.

It is a consoling thought that if for any reason a diet must be so limited that we cannot be sure of the vitamin supply, we can advance on the drug store and get some of the lacking essentials. In some cases, under a physician's directions, we will add an extra supply to our diet.

Down in Baltimore we find Doctor McCollum of Johns Hopkins advancing the theory that the provoking cause of pernicious anemia may be a lack of vitamin B. Doctor Fletcher of Toronto has had excellent results from treating cases of arthritis with concentrate of vitamin B.

Doctor Howe of Boston and Doctor Hanke of Chicago have had success in treating cases of pyorrhea and dental caries with food containing large amounts of vitamin C. We are told that research in regard to the causes of the common cold point toward a lack of vitamin A.

Common sense, then, indicates that we should attempt to choose a diet which is rich in vitamins, supplementing it, if necessary, by concentrates from the drug store and by nature's source of vitamin D—the rays of the sun.

It is unnecessary for us to pick out each food with reference to its special vitamin content. The usual rules for a sane diet apply. I must stress the importance of liberal amounts of milk, vegetables, fruits, of some eggs and meat and of a padding of fat, sugar and starch to make up the calories. No matter what news item you read, these basic facts hold good.

Baked Liver With Stuffing.

1 calf's liver
Salt
Pepper
Salt pork
1 tablespoon butter
Bread stuffing

Wash liver well in cold salted water. Make an incision in the thickest part with a long, narrow sharp knife. Fill with well-seasoned bread stuffing. Season the liver with salt and pepper and flour it. Place it in a roasting pan, lay strips of fat salt pork over it, and add a little water. Roast for one hour, 480 degrees Fahrenheit for 15 minutes and 350 degrees Fahrenheit for the rest of the time, basting every 20 minutes. Thicken the gravy in the pan and serve with the meat.

Caramel Cream.

1 cup brown sugar
2 cups milk
¼ cup flour
2 eggs
2 tablespoons chopped nuts

Scald in double boiler one and one quarter cups of milk with the sugar. Mix flour with egg yolks and remaining milk. Add to the hot milk, stirring constantly until it thickens. Remove from fire and fold in stiffly beaten egg whites. Chill and serve with whipped cream and the chopped nuts.

Cheese and Jelly Salad.

¾ cup cream cheese
¾ cup chopped celery
2 tablespoons chopped olives
Lettuce leaves
¼ cup chopped nuts
French dressing
Guava jelly

Mix cream cheese with chopped celery and olives and form into small balls. Roll each ball in chopped nuts. Arrange on lettuce leaves and serve with french dressing and guava or currant jelly.

New Use for Oat Hulls

Artists' crayons can be made from oat hulls, an agricultural waste. By treating furfural, an oil yellow liquid made from the hulls, with various simple chemicals, a black substance suitable for crayons has been produced. Tests show such crayons are satisfactorily in use, as compared with charcoal, and by varying the chemical treatment crayons of varying hardness and blackness can be obtained.—Popular Mechanics Magazine.

POLITICAL PARTIES IN ACTION

The political war-horses are being groomed for action and the old line political parties are thus early going into race for national supremacy. This is just at a time when propaganda can be used with effective results. Will the principles of Democracy survive?

According to the election slate there is to be asweeping list of Congressmen in the contest for election and about a third of the United States Senators. The Roosevelt administration is to be the criterion of the campaign. Charging that the NRA is a failure, does not help the administration, and instead of standing loyal with the President to "work out" some solution to relieve the present crisis, it would seem that the situation has turned into a political racket.

Notwithstanding the "off year", a far greater and more important election in November will take place than any Presidential election in history. It will be a shaking up of members in both Houses of Congress, where lies the strength of all legislation.

The experiences of the past year have generated a more healthy state of public thought. The country seems to still have confidence in the President's integrity and leadership, but there is no longer the illusion that he is a miracle worker who can do the impossible, nor can any group of men guide the economic ship of state over the distressing sea of trouble into a safe harbor in no one year, or perhaps two years.

It is very plausible to admit that we are no worse off than we were a year ago, thus the intelligent voter will not be carried away with the thought that the President has been a total mistake; perhaps few men in his place, could have mastered the situation any better though widely different. After all then, we may expect a deluge of political propaganda the few coming months, with not much immediate relief for the country in its present state.

* * * *

Instead of coming to political blows, we, as a country, are coming to an understanding. Graft, politics and various irregularities in high places are becoming less frequent every day, and armies of men appointed to office have found out the fallacy of compromising with conscience, in order to gain for themselves. When we begin to show our integrity and love for government and can have confidence in man, the future of humanity will not suffer from grevious wrongs committed by sneaks and pilferers in office.

* * * *

A good example before the world is the conduct shown between United States and Canada toward each other. For 150 years nothing but harmonious spirit has existed between the two nations. Fact is, the neighborly ties existing are cemented by a peaceable arbitration in tariff questions and many reciprocal agreements over trade and commercial intercourse. The greatest advantage of the peace between the two nations is the resolve not to take up arms against each other. This has been emphasized, since no bitter feeling exists, nor ever will. Canada is a good neighbor and a good example for world peace.

* * * *

Governor Merriam shows the economic spirit as he deals with the state's issues, and no state certainly is in need of executive action any more than is California. We are thrown into a vortex of knotty problems in financial affairs. If Governor Merriam can bring relief he will be greater than a chief executive of the state. He will be a Moses and an example in national leadership hitherto unheard of, for California's straightened circumstances are quite akin to the nation's. His economic weeding process is to go forward on basic merit, forgetting political forulas and rudiments. Economy and efficiency can save; it is the only prerogative in the face of a staggering deficit of thirty million dollars. Governor Frank Merriam seems to be the logical leader to put it over, and public pride over the state is lining up for cooperation.

* * * *

The national aspect seems to be strong for vast changes in political affairs—such changes which are favorable with President Roosevelt, embodying unemployment and old age insurance as a basis for restoring America to the well-being of the people. This will be the big job for the 74th Congress in January. Messages to that effect by the President, presage a radical set-up, and all to be forthcoming without untimely delay. The whole country appears to be in a state of rebuke over delay of action in the past. Nothing will suffice now. Public sentiment is permeating the land as a peaceful warning against experiments and lesser important matters that work out no good. The situation is crystalizing and soon there will be surprising results, with its declaration of principles for living under our flag with a new purpose of equality for all.

* * * *

The New York stock exchange is "seeing things." There has been some severe conflicts between the bulls and the bears within the past few years, but figures prove that it has weathered the depression far better than many suppose. Members admit that they have made a profit of near a billion during the past six years. During these fat and lean years there has been two booms and four depressions. There are over a million members in the Exchange and over 600 firms represented. This great financial artery is a strong factor and can drain or drive the banking or business life of the land with its cruel lash of power, about as it desires.

* * * *

California has excelled in propagating and raising the Alligator pear, the aristocratic fruit of the present day. But the Golden State has now a real rival in the field of production. Florida is growing alligator pears and the two fruit sections compare favorably in quality deliciousness. This would indicate that the two states have a like climate and other favorable conditions for producing this very choice variety of fruit. Those who hark back a few years can remember when the avorado sold for a minimum of 25 cents a piece and often more than that, but now you can relish the rich fruit and know that it is available for about a fourth of that price.

This isn't an extravagance, Jim!

LOTS of things you want to buy are extravagant—you'd be the last to deny it. But, as any housewife knows, there's nothing extravagant about buying an Electric Refrigerator. Quite aside from the safety and convenience it makes possible, an Electric Refrigerator actually saves you money in the long run!

Waste is reduced to the minimum—left-overs can be saved and used—inexpensive desserts and salads can be prepared—and the result is a saving that greatly exceeds the cost of operation! Then, too, you can buy foods in quantities advantageously when you have the Electric Refrigerator to keep them fresh until you need them. See a dealer today!

THE LOMALAND SCHOOL TO PRESENT PLAY JUNE 28

On the evening of Decoration Day the pupils of Lomaland School presented a full dress rehearsal of their commencement play "Balder the Beautiful" for the benefit of the staff. The drama is based on the Scandinavian myth of the death of Balder, the Sun-God, whose passing symbolizes the close of the Golden Age and the advent of the Age of Darkness, which in its turn will be followed by a return to still more glorious cycles of evolution in the future. The plot is interpreted by traditional songs and dances of the Northland, dances and the singing of several songs in Swedish. The young performers' ages range from three to seventeen years, and several of the performers are the sons and daughters of prominent members of the community.

The grouping and coloring is of an exceptionally high character, and the atmosphere of the North will be attractive to all whose memories linger yearningly in the land of the midnight sun. The play will be presented in the rotunda of the academy building on the night of Thursday, June 28th, and admittance will be by program—an artistic production with notes and an explanation of the symbology of the myth of Balder. Application for programs may be made thru the several Lodges of the Point Loma Theosophical Society in the vicinity of San Diego and at the Theosophical Headquarters, and outside the building on the evening of the performance.

MOTION PICTURES OF SEA LIFE TO BE SHOWN

The San Diego Shell club will meet Monday evening, June 25 at 7:30, at the Natural History museum in Balboa park.

Several reels of motion pictures of sea life, taken by Dr. Myrtle Johnson of San Diego State college,

THE THEOSOPHICAL SOCIETY: POINT LOMA

"Humanity is facing the most serious crisis in thousands of years," declared Miss Alice Peirce in a Forum-Lecture on "Psychic Pitfalls" in the Temple of Peace last Sunday afternoon. The speaker surveyed the menacing world conditions of today, and placed the widespread interest in psychic phenomena, and the exploiting of these little-known powers of man, as by no means the least among present alarming conditions. Palmistry, crystal-gazing, psychometry, clairvoyance, and above all, hypnotism, were all named as dangerous practices, concerned with the lower mental-emotional aspects of man's constitution. Miss Peirce was supported in answering the queries of the audience by Dr. Emma Wilcox, Dr. Joseph Fussell, and Iverson L. Harris.

Next Sunday, June 24th, W. Emmett Small will present the subject of "The A B C of Occultism" in a forum-lecture at three o'clock in the Theosophical Temple on Point Loma. Written and oral questions are welcomed at all times. All are welcome.

Parents and teachers who are interested are advised of the Lotus-Circle Forum, which is held on the last Sunday each month, this month on the 24th June in the Rotunda of the Lomaland Academy at 2 o'clock. Questions will be answered on methods and Lotus-Circle activities and those who wish to do so may remain on at three o'clock to see the Lomaland Circle in its regular session.

Judge Philip Smith Seeks Reelection

Announcement of his candidacy for re-election to Justice Court three, San Diego Township, was made today by Judge Philip Smith.

While serving in Justice Court three, Judge Smith's tenure of office has been marked by constructive achievements. He is the founder of the Juvenile Traffic school, has materially reduced expenses in all lower courts and is the author of the proposed auto death law.

In keeping with the economy program of 1933, Smith not only reduced expenses in his court, but secured the voluntary adoption by all reporters in the lower courts to work for a flat salary instead of the former wage of $15 per day plus a 30 cent transcript fee for each folio. Figures in the County Auditor's office show San Diego County will be saved $4,190.59 this year alone as the result of the adoption of this plan.

Eighteen months ago Judge Smith organized the Juvenile Traffic school to deal with young offenders. Youthful violators must attend four Saturday morning sessions and study traffic ordinances and safe driving rules. So successful has this school been, juvenile traffic accidents have been reduced 40 percent and other communities are establishing similar schools. Another measure of Judge Smith's, which is designed to promote safer driving, is an auto death law which will be submitted to the next session of the state legislature. Under the proposed law, the jury would determine the penalty for a person who had been involved in a fatal traffic accident. The law has been endorsed by leading jurists and enforcement officers throughout the state.

Judge Smith is considered the foremost authority on traffic problems in southern California. He is a member of the San Diego Public Safety committee, chairman of the Judicial committee of the Safety Division of the C. of C., and is a member of the San Diego Traffic commission.

Judge Smith lives with his mother, Rose Smith, at 3611 Thirty-first St.

VOTERS MAY REGISTER UNTIL JULY 19

A Lecture on Christian Science by Judge Frederick C. Hill, C. S.

Judge Frederick C. Hill, C. S. of Los Angeles, California, member of The Board of Lectureship of The Mother Church, The First Church of Christ, Scientist in Boston, Massachusetts, delivered a lecture entitled: "'Christian Science: God's Law of Progress" at three o'clock Sunday afternoon, June 17, 1934, under the auspices of Sixth Church of Christ, Scientist, San Diego, in Point Loma High School auditorium. The lecturer was introduced by Mrs. Mabel R. Johnston, C. S., First Reader, who said:

Friends: Sixth Church of Christ, Scientist, of this city, welcomes you here this afternoon. It is with hearts overflowing with gratitude for health and that "Peace which passeth all understanding" that we desire to present this lecture to you.

In the Bible, the thirteenth chapter of Matthew, Jesus said to his disciples "Many prophets and righteous men have desired to see those things which ye see and have not seen them and to hear those things which ye hear and have not heard them".

It is our privilege today to have with us one whose spiritual understanding of the Bible and Christian Science will enable us to see and hear that Law of God which our Master taught to his disciples.

In order that all the world might see and hear this Truth our beloved Leader, Mary Baker Eddy, established in 1898, The Christian Science Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.

We have invited Judge Frederick C. Hill of Los Angeles, California, a member of that Board to deliver his lecture entitled, "Christian Science: The Law of Progress".

Judge Hill:

The Lecturer spoke substantially as follows:

In presenting the subject of Christian Science to you I shall make an earnest endeavor to present its object and purpose from the standpoint of what it is and how it operates, as distinguished from that which it is often erroneously believed to be.

I can think of no better introduction in presenting the motive and purpose of Christian Science, than to refer to a public declaration recently made by a clergyman who, in the course of a sermon, is reported to have said, "Christian Science sprang directly out of the Holy Scriptures, for Christ introduced healing and the driving out of superstition in his own day." From this declaration it should be plainly apparent that the religious world is beginning to recognize that Christian Science is a religion; and that the fundamental purpose of this religion is to reinstate the essential elements of primitive Christianity, including the element of spiritual healing.

How Achieved

The object and purpose of Christian Science may be recognized by many thinking people who do not subscribe fully to its doctrine, and the question may be asked, Can these desirable ends be attained in this day and age? In answer to this query it may be helpful to consider some of the positive statements which we find in the Bible and which are recognized as truths by all religious people.

Solomon, who has been declared to be the wise man, writing with reference to the mortal experience of man, has declared, "For as he thinketh in his heart, so is he," plainly indicating that the mental status is the key, or the index, to the man. Paul, in his epistle to the Romans, has declared, "Be not conformed to this world: but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable and perfect will of God," further indicating that there are states and stages of transformation and that these transformations are brought about through the elevation, education, and reformation of thinking.

The Galilean Prophet, Christ Jesus, once said, "And ye shall know the truth, and the truth shall make you free." Since the time of that important declaration, humanity has asked the questions: What is truth? Can truth be discerned, intrepreted, and intelligently applied? The answer to the last question is positive and direct. The truth is discovered, interpreted, and applied in proportion as an individual reforms and transforms his thought to conform to the law of spiritual, scientific thinking.

In the material universe we observe the operation of that which mankind has been pleased to define and term as law. We observe that humanity is made up of individuals bound together and held by the various phases and codes of man-made systems of law. We further observe that in the universe about us there is in active operation a force which has been termed the law of gravitation. We also observe that which has been termed the law of numbers, and the law of harmony. Would it not then be reasonable to assume that as mankind observes about them these various phases and forms of material expression, there is a fundamental spiritual law by which man lives, moves, and has his being? We not only affirm this to be a reasonable and normal assumption but that it is a provable fact,—that there is a spiritual law of man's being. Hence, there must be, there is, a rational way by which men can discern, interpret, and intelligently apply this fundamental law, to the end that they can solve every distressing problem of mortal existence. Throuout the world there are hundreds and thousands of individuals who thru the study of Christian Science have discovered and are interpreting and applying that law. Hence, in this lecture it is our purpose to discuss and present the subject of Christian Science from the standpoint that it interprets God's law of progress.

An Essential Element

Human law has been defined to be a governing rule of conduct prescribed by a supreme power, commanding that which is right, and prohibiting that which is wrong. This law is but the attempt of mankind to pattern infinite, divine law.

I ask you to pause and consider for a moment. That which is right, of necessity is good. And that which is both right and good, is true. When we apply this logical line of right thinking we shall at once discover that there is a law of God, of good, and that this supreme law finds expression in a positive command to observe that which is right, that which is good, and that which is the truth. Hence, just to the extent that men discover and obediently follow the law of man's being, they will have discovered the truth which Christ Jesus declared and demonstrated centuries ago that mankind should know. And the knowledge of this truth will make us free from every one of the deluded beliefs of the human mind.

It would be very reasonable to assume that there are many individuals before me at this time, or who will read this lecture, who are not Christian Scientists and who do not practice its religious teachings. We welcome this occasion and this opportunity to help such to form right opinions and right conclusions regarding this religious teaching. There are certain historical facts connected with the Christian Science organization which should be thoroughly understood by every thinking individual.

Christian Science: Its Inception

Christian Science is a discovery. It is the discovery of an absolute provable law. This discovery was made in 1866, by a gentle, New England woman, Mary Baker Eddy. She named her discovery "Christian Science." She defined Christian Science "As the law of God, the law of good, interpreting and demonstrating the divine Principle and rule of universal harmony" (Rudimental Divine Science, p. 1).

After her discovery, in 1866, Mrs. Eddy submitted her discovery to proof. As a result, she observed that just in proportion as she understood and interpreted this law of man's true being to the daily affairs of her human experience, that her thought was elevated and transformed, that this transformation of her thinking was expressed in the enjoyment of a better sense of health, happiness, peace, and contentment. Accordingly, she had a deep desire to share her discovery with the world. She wrote and published her book, "Science and Health with Key to the Scriptures," which she designated the Christian Science textbook. This book is not a Bible. It is not a substitute for the Bible, but it is just that which its name indicates, a Key to the Bible, to aid and assist in discovering, interpreting, and applying the healing spiritual truths set forth in the great English classic, the King James Version of the Bible.

Mary Baker Eddy was a great woman. She was born in 1821. Up to the time that she was past fifty-four years of age her life was spent substantially as the lives of many other New England women. In 1875, the first edition of her book, "Science and Health," was published. It became public property. It was read by thoughtful people throughout the world. From the first it challenged the attention of thoughtful readers.

It is now more than fifty years since this book became public property. The interest of the reading public therein continues unabated. The interest in this book has grown by leaps and bounds, until it has become recognized and declared by many as the most important production, among religious writings, with the exception of the Holy Bible.

The reading and the study of this book has inspired faith and confidence in the teachings of the Bible. It has brought elevation and transformation of thought to many, and there are hundreds and thousands of individuals throughout the world who have been so transformed in thought that this transformation has been,and is, expressed in health, happiness, peace, and contentment. These individuals owe their present existence on this plane of human experience to the transformation wrought in their lives by her discovery and the gift of Christian Science to humanity.

One such instance of transformation that came under the personal observation of the speaker is that of the wife of a clergyman, who had become so ill in mind and body that it was necessary for her protection that she be committed to one of the state institutions in Illinois.

A niece of the patient, who had experienced healing in Christian Science interested her practitioner in this case.At this time the patient had been an inmate of the institution for more than ten years. Through the faithful work of the practitioner and her niece, who daily read to her from the Bible and the Christian Science textbook, at the expiration of six months she was healed and left the institution. At the end of one year she was discharged, cured, and was restored to her rights as a citizen and to the care and management of her property.

After her healing through the study and application of Christian Science she became the librarian of a public library in a city of considerable size, and later the Second Reader of the Christian Science church in that place.

In 1879, Mrs. Eddy organized a church; to use her words, ". . . . a church designed to commemorate the word and works of our Master, which should reinstate primitive Christianity and its lost element of healing" (Manual, p. 17).

It is now more than fifty years since the establishment of this church. The Christian Science movement has developed and progressed until there are now more than twenty-six hundred branch church organizations throughout the civilized world. And every branch organization is established upon the same fundamental foundation—an earnest endeavor to reinstate the essential elements of primitive Christianity and spiritual healing.

In 1908, Mrs. Eddy established The Christian Science Monitor, an international daily newspaper, which from the standpoint of clean journalism is regarded by many as the highest standard in the newspaper world.

I ask you to pause just for a moment, consider the measure, or standard of greatness as laid down by our poet. Draw a mental picture, if you please, of one woman who, between the ages of fifty-four and eighty-seven years, has been successful in giving to the world three great avenues, channels, and means of transforming and elevating the entire mass of human thinking. Consider her contribution to humanity through giving to the world a great book, establishing a great church, and founding a great daily newspaper, and I am sure you will readily agree that these are not minor successes: they are major achievements, and as such are sufficient evidence to sustain our claim that she was truly a great woman.

Medicine—Science—Theology

When Christian Science, as a religious teaching,was given to the world, it challenged the thoughtful attention of three separate and distinct modes of human thought.

By reason of the endeavor to reinstate spiritual healing, Christian Science, of necessity, challenged the attention of the medical world.

In her endeavor to secure a name or a phrase properly to describe her discovery, Mrs. Eddy took two words, "Christian" and "Science." She conjoined these words, and named her discovery "Christian Science." These words acted as a challenge to two other classes of thinking individuals. The material scientist at once was interested to know what connection, if any, there might be between science and religion. And by reason of the same logic the word "Christian" became a challenge to the religious world. The clergy at once became interested to know why the word "Christian" should be connected with the word "science"; hence, we have Christian Science, a distinct challenge to the medical, scientific, and religious modes of thought, as constituted fifty years ago.

I feel quite safe in assuming that there are many individuals who may not agree with the theology or the teaching of Christian Science who will readily subscribe to the truth of two fundamental statements made by Mrs. Eddy in the Christian Science textbook, "Science and Health with Key to the Scriptures." She declares, "Progress is born of experience" (p.296); and, "Progress is the law of God" (p.233). If it is admitted that these are true statements, then there is an inescapable conclusion, namely, that the only progress that has ever been made is born of, and is the result of, past experience. Hence, humanity has been and is continually ascending to higher levels of thought and action, until today we are on a higher plane of unfoldment and development than that occupied by those who lived fifty years ago. And there is another conclusion equally definite and positive, that those who live fifty years from this time will continue to ascend to still higher levels of thought and action, and will thereby evidence the law of progress.

These conclusions are not mere idle statements; they are provable facts. Let us briefly review the progress and development in the medical, scientific, and religious worlds of today as compared with their status of fifty years ago.

Many of you are familiar with the fact that in the treatment of the diseased conditions of humanity, the medical world of fifty years ago failed to recognize thought as a factor in producing disease, and consequently gave little heed or attention to the transformation of thinking as an element in healing bodily conditions. By this we do not wish to be understood as stating that none of our medical practitioners recognized thought as a factor, but that the profession in general did not accept it as such. All down the years, as we approach the present time we find physicians who thought deeply on this subject and who have had the courage and the conviction to speak boldly thereon. Let me call your attention to a specific instance. Dr. Stewart Patton,M.D., of New York City, in a lecture delivered in Princeton University said: "The campaign to find out more about our minds and to apply the knowledge we already have is the only rational basis from which the fight against physical disease can be conducted successfully. The fight against physical disease would have been far more effective had the members of the medical profession devoted more time and attention to the cultivation of the art of forming good mental habits and observing the essentials of clear thinking.

Peace, prosperity, and the progress of civilization are literally waiting for the physician to recognize not only that the sound body is essential for the sound mind, but that to know and understand the organization of mind is the first step toward the securing a really sound body." (Reported in Harper's Magazine, January, 1924, p. 165.) Another instance may be cited in which Dr.George W. Crile, head of the Cleveland Clinic of Cleveland, Ohio, states emphatically that "medical research now points to the conclusion that fear, worry, jealousy, and hate stimulate an increased and destructive activity in many parts of the human body." He further says, "Man cannot fear, he cannot hate, he cannot worry intellectually—he fears with all of his organs."

Dr. Robert H. Halsey, president of the American Heart Association, declares: "When we reflect on the powerful influence that mental emotions exercise over the action of the heart; on the changes effected, in this respect, by anger, hatred, and revenge; by love, by joy, or sorrow; by avarice and ambition; when we agree that functional derangement is daily and hourly produced by the activity of those feelings, then we are bound to believe that disorders of circulation and the heart have increased in later years." Thus we observe the progress made by physicians in the medical world as evidenced by their recognition of thought as reflected in bodily conditions.

Turning our attention to the changes observed in the realm of material science so called, the materialist of fifty years ago read the Christian Science textbook with a view of determining whether this religious teaching set forth the essential elements of material science.

The materialists who read the textbook soon discerned that Christian Science draws the line of demarcation clearly and distinctly between the alleged reality of things material and the absolute reality of Mind,or Spirit.

This discernment aroused quite an interest and discussion in the scientific world. In due time, however, the subject was dismissed lightly with a wave of the hand and a jocular remark: "That's but the opinion of a woman. In due time she will change her mind." We ask you candidly whose mind has changed in the last fifty years? Read the books, the lectures, the public statements of our well-known and recognized material scientists of the day. Behold the spectacle! We observe that the materialists of today take issue with their brethern of fifty years ago, and declare that separate and apart from states and stages of consciousness there is no matter-stuff—a reversal of their former position.

What do we observe with reference to the changed attitude toward Christian Science in the religious world? The clergyman of fifty years ago formulated two very definite conclusions regarding this religious teaching. That it was a sure road to perdition and destruction—and that it was the teaching of atheism, because it was said that Christian Science did not set forth the true nature and the character of God.

As evidence of a changing and tolerant attitude of the clergy of today, I called your attention in the beginning of this lecture to the declaration of one of our clergymen, that Christian Science sprang directly out of the Holy Scriptures. He further said, "Mrs. Mary Baker Eddy, the Founder of Christian Science, did much good in the world, for she liberated many thousands of people from the fear of death and the ravages of disease." A president of one of our institutions of learning has declared that the Christian Science churches are filled today, due to the fact that Christian Science teaches that there is a living God—thus refuting the argument that this religious teaching is destructive or atheistic in character.

We have brought this evidence to your attention, not for the purpose of confusing your thinking, or seeking to impress you that the medical world has recognized Christian Science as a healing agency, not for the purpose of having you believe that the scientific world has recognized the essential elements of true science therein, and not for the purpose of striving to convince you that the religious world has adopted the theology or the teachings of Christian Science. It has been submitted for your thoughtful consideration solely for the purpose of causing you to see the truth of the statements quoted from the Christian Science textbook, that, "Progress is born of experience"(p. 296), and, "Progress is the law of God" (p. 233).

God the Lawmaker

We have assured you that man lives by divine decree, and that there is a spiritual law of his being. We have been endeavoring to present to you God's law so that you may interpret and apply that law in human affairs. However, it should be plainly apparent to the thinking individual that before we can apply a basic law we must have some right knowledge and understanding of the nature and the character of the Lawmaker. Hence, it should be our fundamental purpose to discern the true nature and the true character of God, the infinite creator and the author of spiritual law and order.

In this connection we affirm positively and emphatically that the traditional sense or understanding of God as a superman or as a corporeal Jehovah is not the vision or view of God as presented by Christian Science.

In the Christian Science textbook (p. 465) God is defined thus: "God is incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love." Let me ask you to make an earnest endeavor to apprehend and understand God as infinite Mind. An inquirer may say, Do you mean that God is Mind and that I can understand Him as such? Most assuredly! We may just as well understand now and here that the only vision or view of God that we will ever have is the Vision or view which we obtain through the expression of the activities of Mind, which reveal to us His attributes, His nature, and His character.

The inquirer may further say: But I have a mind of my own. My mind is a separate, distinct entity. My mind is a mortal, material human mind. Is this mind God? If so, am I God? You surely do not contend that my mortal, material, human mind is the infinite divine Mind. If so, that would make man God. You are quite right in both conclusions. The mortal, material human sense sense which you call your mind is that defined by Paul as the "carnal mind," and which he declares is "enmity against God" and not "subject to the law of God."

Progress: Individual Responsibility

There is a divine Principle, or spiritual law which governs and controls man individually and collectively. Through the understanding of, and obedience to, the demands of this law, as an inevitable result his progress is natural and normal. However, when ignorant of, or disobedient to, this spiritual law, he pays the penalty therefore through discord, want, sorrow, and woe, and thus man is compelled to make progress through suffering and Science. This is one of the fundamental teachings of Christian Science. In the Christian Science textbook Mrs. Eddy directs attention to this scientific regeneration as follows: "Either here or hereafter, suffering or Science must destroy all illusions regarding life and mind, and regenerate material sense and self" (p. 296).

There seems to be at times a question of paramount importance, Are we making progress? The question is an individual one, and can be answered intelligently only by the individual as he views and comprehends the true nature and character of progress.

Now to many, progress is merely the attainment of some form of success, purely material in character.

Christian Science compels us to prove each step of progress through the spiritualization of thought and action. Just in proportion as we enlarge our conception of God as divine Mind or Spirit, we ascend in the understanding that man is spiritual, and not material. We thereby prove to ourselves individually that we pass from an illusive belief of life in matter to an intelligent recognition of the true idea of life in Mind; that we attain this understanding not through the experience called death, but through the proof of the understanding of Life spiritually discerned. This spiritual discernment is true progress.

I am sure we all readily agree that humanity in the past, through ignorance of this law, has faced serious conditions. Perhaps not an individual or a group of individuals in the world can successfully forecast or predict the immediate events of the future. There is one thing, however, upon which we all can and must agree. We face changed conditions and a new order of events. There must be, there will be, transformation and unfolding of new and better ideals. Every individual has a duty and a responsibility in bringing order out of chaos and a reestablishment of better conditions. This individual responsibility can be successfully met and mastered only as one clarifies his vision with reference to the nature and the character of God as infinite Mind, and as he seeks earnestly and intelligently to express and reflect in his thinking the wisdom, goodness, justice, and mercy of God.

In this connection, let me ask my hearers and readers to do a very simple but sensible thing. Assuming that you are all engaged in the activities of life, let me ask you before assuming these daily duties, to pause for a definite, or a specific period of time and devote this specific period to an earnest endeavor to catch a glimse of God as Mind. Exclude from your thinking everything that does not square by the understanding of that which is right, that which is good, that which is holy, that which is true. In your thinking, rise to the understanding that infinite Mind is infinite intelligence and as such is omnipotent, the only power there is; that in infinite Mind the only wisdom, truth, knowledge, understanding is there expressed as the omniscience of God. Realize that infinite Mind is here and everywhere, now and at all times; that infinite Mind is omnipresent. In this brief interval you no doubt will clarify and expand your vision of the infinite creator. Right ideas regarding His nature and character will unfold in your thought. I ask you seriously to reflect upon and consider this question: What effect, if any, will this clarified understanding of the nature and character of infinite Mind bring to your business activity? There is but one conclusion; to a greater or a lesser degree, as you have expanded your vision of the scope and the magnitude of Mind, you have enlarged your own mental horizon, you have discovered the nature and the character of your business,—not as the activity of the barter and the exchange of goods and commodities, but you have discovered that the nature and the character of your real business is rightly to understand and rightly to reflect the intelligent activity of infinite Mind. You have placed yourself and your business activities squarely in line with the law of your being; hence, you have the right to expect and conclude that definite and positive right results will ensue in every right undertaking. By this process you have experienced a healing through the transformation of your thinking and you have the right to expect that normal results will be reflected in your business and in your body.

At this time I am reminded of the circumstance of a merchant who experienced the beneficial results in his life and business through his adherence to constructive, spiritual thinking and study.

This merchant had been a successful business man in his community, but through business and financial worries, fear, and discouragement, his physical condition reached a point where he was unable personally to attend to his business. During the following three years he was attended by several physicians who pronounced his difficulty chronic heart disease.

At this time a friend, a business associate, brought him a copy of Science and Health and showed him how to study the daily Lesson. This merchant has never been a Bible student prior to this time. Through the study of Science and Health he became deeply interested in the study of the Bible. His improvement was apparent from the beginning, and after five months of earnest study he was enabled to return to his store and once more give his personal attention to the rebuilding of his business.

Through this study he not only regained his business in a much greater measure than before his illness but he was perfectly healed of heart trouble, as was evidenced by the fact that he was pronounced by the examining physicians to be in perfect health and was enabled to secure life insurance at the age of fifty years. This healing was experienced some years ago and I have knowledge of the fact that these discordant conditions have never returned.

Definite End Accomplished

In the beginning of our lecture we stated definitely and positively that Christian Science is an endeavor to reinstate primitive Christianity and spiritual healing.

These desirable ends are accomplished in a definite and a fixed way. I direct your attention to the following religious tenet of Christian Science, as given in "Science and Health with Key to the Scriptures" (p. 497): "And we solemnly promise to watch, and pray for that Mind to be in us which was also in Christ Jesus; to do unto others as we would have them do unto us; and to be merciful, just, and pure."

Every Christian Scientist, member of The Mother Church or of a branch thereof has obligated himself to express and reflect, in some way, that Mind which was in Christ Jesus. Just how many calendar years will elapse before mankind generally will express or reflect all the attributes of that Mind cannot be definitely stated or ascertained. This, however, does not in any degree relieve us of the responsibility of seeking to gain and to express that right understanding of Mind, looking forward to and expecting the advent of the day described by Paul, "Till we all come in the unity of the faith, and of the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fulness of Christ."

The perfect man is not a myth. The perfect man is here and now. He is not the mortal, material man, subject to the fear of death and the ravages of disease. The perfect man is spiritual man, made in the image, the likeness, of infinite Mind, of God.

Paul refers to the new birth, and the poet Whittier expresses to some degree man's progress in this direction in his poem,—

"O, sometimes gleams upon our sight,
Through present wrong, the eternal right;
And step by step, since time began,
We see the steady gain of man."
(Christian Science Hymnal, No. 238)

SYNOPSIS

Ranceford Kershaw, last male member of the Kershaw clan, dies suddenly while riding with his daughter, Lorry. At the close of the Mexican war, Robin Kershaw, with his bride, rode into northeastern California. Here he found an ideal valley for cattle raising. They christened it Eden Valley. Below Eden Valley is a less valuable tract which Kershaw's wife christens Forlorn Valley. Joel Hensley, a Texan, settles in the lower half of the valley. There is bad blood over fences and water for irrigation. Kershaw kills Hensley and the blood-feud is on. By 1917, Rance Kershaw, his son Owen, and daughter Lorry are all that remains of one clan. Nate Tichenor is the sole survivor on the Hensley side. He goes to help Lorry in her car and finds her father has died of heart disease. Silas Babson, Forlorn Valley banker, schemes to control the irrigation and hydro-electric possibilities of Eden Valley. He proposes to play Nate against Lorry, assuming that they are carrying on the old feud, in this way getting control of the key lands necessary to the project. Nate, however, has no intention of carrying on the feud.

CHAPTER V—Continued

—5—

The deputy sheriff rolled a comical eye at the editor. "I haven't seen the boy since he was in high school here, but from what little I know o' his tribe I should say none o' that breed ever made a threat. They made promises—an' kept 'em."

"I sized him up that way," the editor replied.

After eliciting from Brainerd all the news the latter had, Mr. Rooney strolled away to distribute his tidbit of gossip around Valley Center. Almost the first place he went was to the bank of Valley Center. Henry Rookby, in charge during Babson's absence, received him.

"I see young Nate Tichenor's back in the country. An' Rance Kershaw's kicked the bucket. Died o' heart disease right smack in front of the Bar H gate, an' Nate Tichenor an' Lorry Kershaw 've been in town together an' thicker'n thieves."

"When the cat's away the mice'll play, I suppose. Who told you all this?"

"Brainerd. Tichenor was in an' gave him the story."

"That Nate Tichenor's a bad lot," Mr. Rookby murmured darkly. "I never liked him. D'ye mean to tell me he's around with Lorry Kershaw now, helping her out in her trouble?"

Mr. Rooney nodded.

"The hypocrite! He's back here to smash the Kershaw outfit. Not another reason in life, Bill. Rance Kershaw's estate must owe Tichenor more'n three hundred thousand dollars an' for the past three years old Rance has been using clam shells and woodpeckers' heads for money. Interesting situation. Very interesting."

When he turned to wait on a customer Mr. Rooney continued on to the Valley Center garage to discharge another load of his interesting information.

Arrived back at the Circle K headquarters with Lorry Kershaw, and Miss Lizzie Bachman, Nate Tichenor, after the fashion of a rural neighbor, did the chores. He realized that, with the men all away, Lorry would have had to do them.

He ate his dinner in silence, for both he and Lorry were acutely aware of the presence of Miss Bachman and distrusted her. After dinner he kindled a log fire in the living room fireplace. He was a straight, well-set-up young man, not overly thick but muscular; he had a little crescent out of his left ear and a faint white scar about three inches long ran across his left temple and disappeared into his hair. His teeth were strong, even, white and well cared for. His nose, thin and high and a fraction too long, tended to spoil what would otherwise have been a handsome face, but lent to him an air of distinction. It was the nose of a thoroughbred, a thinker. His eyebrows, heavy and almost black, were a bit overhanging, thus giving to his glance an expression of alertness and directness, particularly when he asked one a question.

Lorry had already observed that he moved with quick, precise motions, like one very sure of himself and in the pink of physical condition.

About eight-thirty the nurse retired; as her bedroom door closed behind her Nate Tichenor arose, shoved an easy chair toward the fire and waved Lorry into it. He remained standing until she had seated herself.

"Too bad your father wasn't here when I called this morning. I might have preserved his life for many years." Tichenor snapped his fingers. "Kismet!" he murmured.

"We thought you were waiting until we got in so deep we couldn't swim out, then you could smash us more easily."

"Had I chosen to smash you a long time ago there was nothing to stop me. You were helpless."

"Then why didn't you?"

"I didn't need the money and I knew I could always protect myself. I could have gotten the ranch at 25 per cent of its value. As a matter of fact, I did plan to buy your mortgage. Surely you do not think I am so careless as not to have kept a close watch on the Kershaws."

"Your people always wanted all of Eden Valley, of course. So you planned to buy the mortgage and foreclose."

"No, I planned to buy it and hold it, because only in that way could I be assured the Kershaws wouldn't be annoyed. I planned to give you time to work out of the jam you are in; then, if you couldn't make the grade, I planned to buy your outfit, lock, stock and barrel, at a fair price. Owen was dead, your father was a cripple and you couldn't operate the business—"

"Of course I could operate it," she challenged. "And I shall. The cattle business is bound to recover. It's getting better every day. Within two years beef will be selling at ten cents on the ranch."

"I do not doubt that. Who is your father's foreman?"

"I am. Since graduating from the university in 1921 I have operated this business. I do a man's work. I know

"Had I Chosen to Smash You a Long Time Ago There Was Nothing to Stop Me."

cattle and I know my job. I can ride, rope, and brand and I bust my own saddle stock. I hire and I fire. I've had to do it."

"And you want to keep on doing it?"

The girl nodded.

"Well, carry on."

"I cannot unless you buy the ranch mortgage to protect me—and yourself, otherwise it will be foreclosed."

"In a few days," he suggested, "go to see Babson and say that I am inclined to grant you additional time provided he will do the same."

"I can't understand why you are so kind."

"It's a fault I inherited from my father." A tiny smile flitted around his firm mouth. "Your grandfather tried hard to be neighborly to my grandfather but my grandfather was hard-boiled and mean and stupid and wouldn't play the game; as a result he spoiled all subsequent opportunities for his clan. It's my chance now and I have a curious yearning to make good, particularly since it will not cost me anything," he added bluntly, as if ashamed of his chivalry.

"I thank you more than I can say. We've been paying the bank in Valley Center 12 per cent on our unsecured loans."

"Well, 12 per cent is legal in this state, Miss Kershaw. However, strike Babson for a reduction to 7. Give him an argument. You may win. Babson's probably as hard as a picnic egg, but he may have an unsuspected soft spot."

"I wish I could agree with you, but I find that impossible. Our ranch was mortgaged to a San Francisco bank, but recently Babson bought it from them—"

"He has a hen on," said Nate Tichenor, "and I'll have to find out whether it's a Bantam or a Plymouth Rock. A coward and a potential crook. Money-mad. A schemer. Miss Lorry, he wants the Circle K ranch. When he ascertained from my attorney that the Bar H was not for sale, he decided to acquire the Circle K, so immediately he purchased your mortgage."

"But why has he developed this sudden interest in Eden Valley?"

"I do not know, but I intend to find out. However, he'll never own the Circle K. Whenever you find yourself unable to hang on to it, I'm the rightful heir to it. Understand?"

"Perfectly. You're sure you will not permit him to crowd me? Sure this isn't a generous impulse because you find me in such a sad case today? An impulse you may, with reason, regret next week?"

He drew a checkbook from his inner breast pocket, went to her desk and signed a check in blank. "You fill that in for what your father's estate owes Babson and his bank," he ordered curtly, "and secure me with your promissory note."

She tossed the check in the fire. "What's your interest in me?" she demanded. "I can understand sympathy and gentlemanly kindness but not a blank check that could be filled in for nearly two hundred and ninety thousand dollars."

"I met your brother, Owen, in France. It was before Cantigny, I was the chief of No. 4 section of my battery, and my gun got bogged in a small shell-hole in the road. The teams were new, half-trained and unused to draft—and the drivers were worse, so I had a lot of plunging and tugging—no co-ordinated effort—and there we stuck. There was an infantry regiment resting by the side of the road, and pretty soon a private came up and told the green lead driver to dismount and let him try. I saw by the way this doughboy soothed the excited horses that he knew horses—so I took the place of the driver on the swing team. Fortunately, I had a good driver on the wheel team, so presently, with the cannoneers and spare drivers at the wheels and pushing behind, we gathered our teams and made one steady, concentrated pull—and the gun came out. And when the infantryman dismounted from the lead team, Owen Kershaw and I recognized each other. I said: 'Thanks, Kershaw. I'm obliged to you. Good luck to you.'"

"What did Owen say?" the girl asked softly.

"Nothing, Miss Lorry. His face sort of twisted. You see, we were all exhausted and hungry and thirsty and we'd been through a lot of mud and blood and I suppose we each had the same thought—that the Hensley-Kershaw feud was a pitiful thing. I know I had a vision of Eden Valley just then. Perhaps Owen did, too, because he commenced to cry silently; and then he came toward me and I commenced to cry, too. We didn't say anything, because there was nothing to say; just leaned against each other and thumped each other's backs and were quiet about it. Owen walked beside me up the road a little, his arm through mine; and finally he said: 'Nate, maybe my dog tag will beat me back to Eden Valley. But if you take care of yourself, you're liable to go back with both your dog tags; and when you do, call on the old man and Lorry and tell them it's an order from me that you're to stay for dinner.'"

"Did he say anything about the water?"

"Yes, he said we were to have it and that he'd write home about it as soon as he got the opportunity. So I told him you'd already promised to let my people have it and that pleased him. And I promised him I'd be a good neighbor and fight as hard for the Kershaws hereafter as our clan had ever fought against them. That affected him very deeply and he dragged me off the road and we swore blood brotherhood, each to the other—and then we embraced like two sentimental Frenchmen and were ashamed of it because we were both hillbillies—and I went on with my section and he went back and flopped with his weary squad—and here I am, and I've been a long time getting here."

"Why did you delay, Nate?"

"I kept remembering him"—he pointed to the bedroom door—"and how he spoke to me that morning I came to ask for the water. I was afraid he'd never understand—so I thought I'd wait and not bother him and gradually inculcate in him the belief that I wasn't a bad sort of citizen. I see now that was poor strategy."

"Life," the girl said drearily, "is a game that is played to be lost."

His hand strayed over and imprisoned hers. "Poor little sister!" he murmured. "So hopeless and bitter—and the sun just rising over Eden after a long eclipse. Life may be a game that is played to be lost, but we'll play it like sportsmen and go smiling to our defeat."

CHAPTER VI

Nate Tichenor slept at the Bar H that night, but returned to the Circle K early next morning, with two men he had picked up in Valley Center. He set them at once to the task of digging Rance Kershaw's grave in the family cemetery, Lorry Kershaw pointing out to them the desired spot. About noon the coffin arrived from Valley Center and he helped the man who delivered it place Kershaw in it. Then he lunched with Lorry and Miss Bachman. At one-thirty he and Lorry hitched a team to a wagon and he drove it around and tied the team in front of the house. At two o'clock the girl met his inquiring glance bravely and said:

"We might as well proceed, Nate. Nobody's coming to my father's funeral."

With the aid of two of the hired men he carried Rance Kershaw out to the wagon and, mounting the seat, drove his late enemy on the latter's last pilgrimage, while Lorry, Miss Bachman, and the two laborers followed in the Kershaw car. At the grave Tichenor read the funeral service, the men covered the grave, Tichenor gave them each a ten-dollar bill and with Lorry and Miss Bachman returned to the house.

He was rather proud of the manner in which Lorry had carried on, even though he had expected her to exhibit the traditional courage of her clan.

"That Affected Him Very Deeply and He Dragged Me Off the Road and We Swore Blood Brotherhood."

Throughout the remainder of the afternoon he sat with the two women in the ranch house veranda and was talkative to a degree only excusable in his own mind because he had the customary masculine belief that it was his duty to keep Lorry's mind off her troubles. Evidently Miss Lizzie Bachman was similarly inspired. He enjoyed (and was certain Lorry did also) the efforts of Miss Bachman to elicit from him information as to his comings and goings since he had left Eden Valley. For three hours he withstood her assaults; then, weary and discouraged, excused himself and motored back home to the comforting presence of his silent valet.

TO BE CONTINUED

Antelopes Are Among Most Deceitful of All Wild Animals; Despise People

Visitors to zoos have nothing but kind words and sympathy for one group of animals on exhibit—the antelopes. The graceful build, expressive eyes and the dainty manner in which they handle their food and step around their enclosures perhaps is accountable for this. Yet the truth is, says a writer in the Detroit News, that there is no single group of wild animals more feared by their keepers and of a more vicious and treacherous nature than these same creatures, be they gnus, hartebeests, waterbucks, Blesboks, reedbucks, impalas, oryxs, springbucks, kudus or any one of the dozen or more "gentle-eyed" gazelles.

There is hardly a zoo in existence that has not recorded either serious or fatal encounters with these animals.

Antelopes are among the most deceitful of all wild animals. They may appear kind, gentle and lovable and stir a desire on the part of the spectator to pet them. Apparently they are the personification of contentment and trustfulness, but lurking under their hide is a lasting desire to kill, which is likely to assert itself at the most unexpected time. This is one lesson directors of all zoos try to drive home to their animal keepers. Never trust an antelope under any circumstances. A buck deer, during the rutting season, may be dangerous, but its attack is a gentle breeze compared with a cyclone when likened to an antelope at any time of year.

Antelope do not need our sympathy. They live by right of hoof and horn and are likely to use both at any time on anything that resembles man.

Hair Worms

Hair worms are objects of curiosity, not only to those who know their habits, but also, to people unaccustomed to seeing them. The life-history of the hair worms is by no means complete. It is known that the eggs are laid in water, and that the young worms begin their lives as free moving animals, which enter the bodies of aquatic insects, which in turn are eaten by fish. After a time they are passed out of the fish's stomachs into the water. After this, little is known, until they are found as parasites inside insects of various kinds, such as beetles, grasshoppers, crickets, etc. They are not poisonous.

Dulse Is Seaweed

The name dulse is commonly applied to two species of edible seaweed which are largely distributed over the coasts of northern Europe and the Grecian archipelago. In Iceland, dulse is stored to be eaten with fish; it is dried and eaten raw or cooked in Scotland and Ireland.

Good Taste Today

BY EMILY POST

Author of

"ETIQUETTE," "THE BLUE BOOK OF SOCIAL USAGE," ETC.

MISCELLANEOUS

DEAR Mrs. Post: My young son gesticulates with his knife and fork at table. This habit upsets me terribly but I can't seem to break him of it. Can you suggest any way?

Answer: Would he mind if he saw you do it? If he would, you might copy him—especially if a friend of his is present. If he does not care, then you will either have to deprive him of some small privileges or (and in my opinion better) let him earn a privilege or an award by marks of excellence: 100 meals without doing it once, for instance, would earn something he wants.

* * *

My dear Mrs. Post: Are cards removed from funeral flowers before the flowers are arranged? Or are the names simply written down for a record to use in writing thank you notes?

Answer: They are taken off and a description of the flowers written on the back of each card, for future thanks.

* * *

Dear Mrs. Post: I have a new daughter just three days old. My husband was killed two months ago. Under these tragic circumstances shall I announce my baby's birth by sending out cards as we would have done, or do I simply do nothing about it at all? If an announcement were sent to the newspaper, how would it be worded?

Answer: Sending announcements of a child's birth is entirely a matter of personal inclination. In your case it would be best to telephone or write to your intimate friends; they in turn tell others. I mean, of course, that a member of your family will do this for you. To send a baby card tied to your own black bordered one would emphasize the tragedy very painfully. I wouldn't if I were you. The announcement in the newspaper would read: "Daughter of Mrs. John Jones and the late Mr. Jones."

Dear Mrs. Post: When my husband and I happen to be in the room, should we shake hands when a boy friend of my younger sister leaves after having spent the evening in our house? This sister lives with us.

Answer: If your sister's friend is a regular visitor, you would probably look up and, without paying particular attention, say, "Good night, Tom!" If he is a stranger, or some one who does not come to the house often, your natural impulse would be to shake hands with him when he leaves.

DINING SERVICE

DEAR Mrs. Post While dining in the house of a stranger the other night I noticed that her waitress brought in a dessert plate with a fine lace doily on it and on top of that a finger bowl. The silver for dessert was already at the places. I had never had a finger bowl brought in just this way. My hostess removed it and the doily from the dessert plate and put the bowl down on the doily at the left to the back of the dessert plate. The dessert was a rich fudge cake, which would have soiled the doily miserably. Is it correct to let a doily take the place of a plate which matches the finger bowl and which stands on top of the dessert plate usually without any doily between them?

Answer: I don't think I understand your question. I don't see how the cake could possibly come in contact with the doily. Doilies are not often used, but when they are, you pick yours up with the finger bowl and put both down together on the tablecloth wherever there is space. Then you put whatever it may be on the plate. You certainly would not put food on the doily, ever!

My dear Mrs. Post: (1) How does one remove watermelon seeds from the mouth at table? (2) A friend told me that tablespoons are not the real serving spoons. I have always used them as such, which must be wrong. (3) Is it ever all right to eat peas with a spoon, in ease, or must they be juggled with a fork? (4) Are little side dishes always tabu? (5) In a restaurant, when foods are sometimes served in separate dishes, is it correct to eat them directly from the serving dish or should all food be put from there over on the dinner plate?

Answer: (1) Remove all that you can with the fruit knife and fork before lifting a piece to the mouth, and any seeds left in the fruit are removed between thumb and finger, or dropped into the cupped hand. They are in either case dried as completely as possible with tongue and between lips. (2) There are slightly larger spoons used for serving, but tablespoons answer perfectly. (3) Spoon absolutely tabu. Mash them slightly with the fork, if you must. But I can't see that there is any difficulty, ever. (4) Correctly, yes. (5) You should put them on your plate, but there is no rule because conventionally side dishes are not used.

© by Emily Post.—WNU Service.

Damp Air Weighs Less

The weather bureau says damp air weighs less than dry air, as the dampness is due to the vapor of water in the air, and vapor of water is lighter than most of the other gases of the atmosphere.

FRIEND OR ENEMY, WIND REMAINS A MYSTERY TO MAN

Of all nature's forces the wind is perhaps the most intangible. Where it comes from and whither it goes no one knows. It can be a kindly friend or a ruthless enemy. It brings showers, clouds or sunny hours; it caresses with a delicate touch or strikes a devastating blow.

Writers of great literature have recognized the wind and its place in the scheme of things since Bible times, for we find in Genesis 3:8, "the cool of the day," margined to mean the wind of the day.

The Athenians gave names to their winds. There was Boreas, the north wind with an icy breath; Apheliotis, the wind from the east; Notos, the breath of the south, and Zephyros, the west wind. By these names the winds from the four quarters were personalized, and in Athens, near the Acropolis, there is still standing a temple built 22 centuries ago known as the Tower of the Winds.

Shakespeare, who drew so largely from nature, makes more than 200 illusions to the wind in his writings. Dickens in more modern times said in one of his stories, "I am always conscious of an uncomfortable sensation now and then when the wind is blowing in the east." And George Eliot writes, "but certain winds make men's tempers bad." Emerson, the American classicist, among his numerous allusions to this force, referred to "the pious wind . . . forgetting . . . prophetic," and in other ways.

The terrible force of the wind is best described by Conrad, virile writer of the sea, in "Typhoon," when he says, "a furious gale attacks him like a personal enemy, tries to grasp his limbs, fastens on his mind, seeks to rout his very spirit out of him."

To the effects of a terrible wind in West Indies we owe the fact that Alexander Hamilton was brought into American history. Born in the little island of Nevis, a British possession in the West Indies, his youth was spent on the island of St. Croix, a Danish possession. Not yet sixteen he wrote a description of a violent wind before the terrors had worn off and while its effects were still visible. Printed in the island paper the story made such an impression upon the governor that the anonymous writer was discovered. This incident was the peg upon which his career turned.—Columbus (Ohio) Dispatch.

"Tums" Builds a Home

St. Louis, Mo.—The palatial new building being erected by A. H. Lewis Medicine Co., is a fitting exemplification of the enthusiastic sentiment of millions of users of Tums.

It will present a striking appearance in its contrast of blue-black terra cotta base with mottled cream above the second floor and glittering gold finish on high vertical mullions. Upper windows, fifty feet high, will have gold effect strips between them and furnish abundant light, while lower portion will have etched windows and stainless steel decorations.

The building, machinery and equipment will cost between $100,000 and $150,000 and is to be used exclusively for the manufacture of Tums.—Adv.

Minnows' Good Work

Minnows solved a serious problem for the Italian engineers who wished to develop Istra, on the east shore of the Adriatic. The place was full of stagnant ponds in which malaria-bearing mosquitoes flourished. The pest was conquered by introducing a special type of minnow from the United States which eats mosquito eggs greedily.—London Answers.

Mercolized Wax

Keeps Skin Young

Absorb blemishes and discolorations using Mercolized Wax daily as directed. Invisible particles of aged skin are freed and all defects such as blackheads, tan, freckles and large pores disappear. Skin is then beautifully clear, velvety and so soft—face looks years younger. Mercolized Wax brings out your hidden beauty. At all leading druggists.

Powdered Saxolite

Reduces wrinkles and other age-signs. Simply dissolve one ounce Saxolite in half-pint witch hazel and use daily as face lotion.

FOR SALE

Going variety store, stock, fixtures, 4 furn. living rooms rear, neighborhood business center, by widow. Reason ill health, alone. Rent reasonable. Cash only. J. GILTNER, 2030 Lincoln Ave., Pasadena, Calif.

Smooth Clear Skin

Don't endure pimples and blotches. Allay them quickly with pure Resinol Soap and safe, efficacious

Resinol

HAY FEVER, ASTHMA

Can be relieved without bad dopes or harmful drugs. Full directions $1.00. THE D & K COMPANY, HAVRE, MONT.

WE BUY Old Gold

Turn your old gold, Jewelry, watches, gold teeth, bridge-work, or diamonds into CASH. Send to us. Receive check by return mail. If you are not satisfied, return our check in 3 days and we will return your shipment.

FINNEY OF THE FORCE — A Fish Line

THE FEATHERHEADS — Going for a Ride

THE CHEERFUL CHEPUB

HELPS SOME

Mr. J.—If business doesn't improve, I'll go crazy. I'm literally up to my ears in debt.

Mrs. J.—Cheer up, dear. Just think how much worse it would be if you were a tall man.

SPRING AILMENT

"Well the baseball season is open."

"Don't I know it! My whole office force has been busy thinking up excuses to be away."

TOO LATE

"My wife complains of cold feet ever since we were married."

"It's a wonder she didn't get cold feet before she married you."

A BIG GUESS

Sherlock—You don't seem to understand my deductive processes.

Watson—Oh yes, I do. Deduction is a guess that comes out right.

FOOLISH QUESTION

"Do you believe that there is a higher power?"

"My dear sir, I married her."

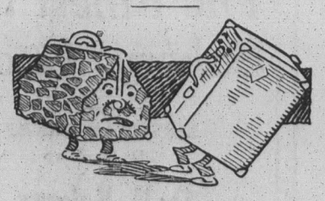

HE MAN IDEAS

"You can't reason with a woman."

"I never try. It's much easier to jolly her."

IT'S THE CLIMATE

Cowhide Suitcase—This weather doesn't seem very cold to me.

Alligator Bag—It would if you had been born and raised in Florida as I was.

A Few Little Smiles

GENEROUS GESTURE

"I note that you occasionally indulge in a joke."

"Yes," answered Senator Sorghum. "Even if it doesn't happen to be a very good joke, it gives my constituents the assurance that I am anxious to do what I can to make them happy."

The Tummy Letters

The primary teacher was helping the children to tell the difference between the letters "d" and "b."

"Johnnie, how can we tell these letters apart?" asked the instructor.

"Well," answered the lad, "one has its stomach in the front and the other has it in the back."

A Specialist

"Doctor, I want to consult you about my stomach."

"But, madam, you are mistaken, I am a doctor of philosophy."

"Goodness me! What strange diseases there are nowadays."—Vart Hem (Stockholm).

Much Worse

Politician (angrily)—Those newspapers tell abominable lies about me.

Friend—And yet they might do worse.

Politician—Do worse! What do you mean?

Friend—They might tell the truth. —Stray Stories.

Vanishing Act

"Mamma, when the fire goes out where does it go?"

"My dear boy, I don't know. You might just as well ask me where your father goes when he goes out." —Vancouver Province.

Judge for Yourself

"How is Morton getting on with his young wife?"

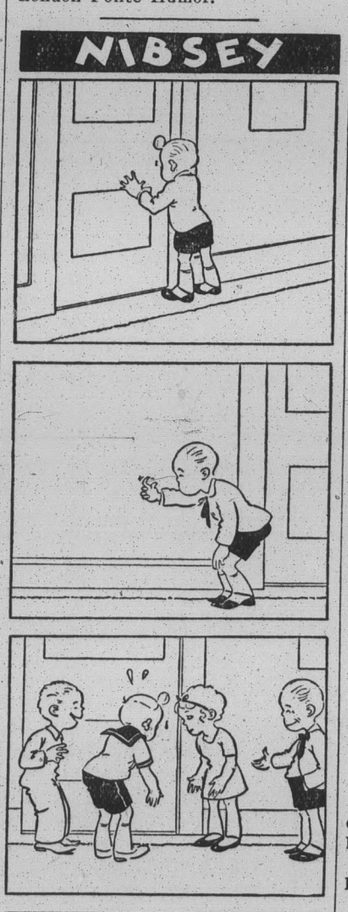

"Well, a month after the wedding a belated telegram of congratulation arrived and they refused to take it in."

All New

He—You want to see "Ball at the Savoy" again? You have seen it three times.

She—Yes, but not in this dress!—London Polite Humor.

NIBSEY

FROCK THAT MAKES PARTICULAR APPEAL TO HOUSEKEEPERS

PATTERN 1625

For smart housekeepers—this captivating frock that will give you a neat and attractive appearance during your busy daytime hours. And as for making it—there's just nothing difficult about it at all. The front and back yokes are economically cut in one, the semi-belted waistline is readily adjusted, and of course, pockets are indispensable. A tubbable cotton print with either self or contrasting ruffling would be nice. The Instructor—illustrated sewing

lesson—will help you put the frock together step by step.

Pattern 1625 is available in sizes 14, 16, 18, 20, 32, 34, 36, 38, 40, 42 and 44. Size 16 takes 3¼ yards 36-inch fabric.

Send FIFTEEN CENTS (15c) in coins or stamps (coins preferred) for this pattern. Write plainly name, address and style number. BE SURE TO STATE SIZE.

Address orders to Sewing Circle Pattern Department, 243 West Seventeenth Street, New York City.

IT PAID BEST

The school teacher was giving her class a talk on the sayings of the wise.

"Now, here is a very good example of what I mean," she said. "'It is more blessed to give than to receive.'"

"Teacher," piped up little Bertie, "my father says he always sticks to that motto in his business."

"How noble of him!" said the teacher. "I'm sure he must be a very fine man. By the way, Bertie, what is your father's profession?"

"Oh, he's a boxer," replied the boy proudly.

Marble Cross, Too?

She—How dare you say my father is a wretch!

He—Well, I told him I could not live without you and he said he would willingly pay the funeral expenses!—Frankfurter Illustrierte.

The Signal

"Why did you call that man a prevaricator? His reputation for truth is good."

"I wasn't expressing an opinion. I was merely employing the customary method of indicating that I was ready to fight."

Watch Out for the Pins

A shirt advertisement asks the question, "What is the thing you look for in a shirt?"

Barracuda Pete answers that one: Buttons.—San Diego Union.

Married Now

"When you were a candidate for my hand, you said I could spend all my winters in Europe."

"That was just a campaign promise."

A Dreamer

"What is a debtor, pa?"

"A man who owes money."

"And what's a creditor?"

"The man who thinks he's going to get it."

LOCAL AND PERSONAL EVENTS

Mr. and Mrs. George B. Kenline expect to leave Saturday for a week's vacation at Laguna.

—‡-‡—

Mrs. W. E. Nelson and sons Billy and Bob left Monday for a two weeks stay in the Laguna mountains.

—‡-‡—

Miss Jane Baker of Cedar Rapids, Iowa, arrived Tuesday to spend the summer with her grandmother, Mrs. Nettie Baker at the Newport hotel.

—‡-‡—

Velskin, the new sunburn lotion, advertised elsewhere in this issue of the News, has been tried locally and is reported as doing all the manufacturers claim for it.

—‡-‡—

Patricia Welch, daughter of Mr. and Mrs. T. M. Welch of 4776 Santa Monica avenue, is returning today from a 10 days stay in the Scripps hospital at La Jolla.

—‡-‡—

Fred Jackson, son of Mr. and Mrs. B. Jackson of 4914 Santa Monica avenue, accompanied by Rex Noble of W. Point Loma Blvd., left Wednesday by auto for Auburn, New York.

—‡-‡—

James Edward Froide, son of Mr. and Mrs. J. P. Froide of Ocean Beach was, on Wednesday evening, initiated into the San Diego De Molays. Among the other nine candidates were young Bill Cords and Harold Bacon.

—‡-‡—

Young Billy Sayles had a large fishing spear thrust into the back of his hand last week and it had to be sawed off before the point could be released. Dr. Eby, who treated Billy, says the boy's hand is now healing very nicely.

—‡-‡—

Miss Dorothy L. Wilcox of San Luis Obispo arrived in Ocean Beach this week and is sharing an apartment in the Kraft building with Miss I. S. Wilcox who came from Sioux Falls, S. D., two weeks ago for treatment from Ivan T. Dowell, psychoanalist.

—‡-‡—

Mr. and Mrs. Norman Foster, who have been managers of Alligator Rock Lodge for the past three and a half years, have now left that place and are residing at 4971 Santa Cruz. They wish to thank all their beach friends for the interest taken in the development of the lodge grounds.

—‡-‡—

Dr. and Mrs. Phipps, who have been residing at Alligator Rock Lodge for the past month, have now left, Dr. Phipps proceeding north in connection with his business interests in Seattle and Mrs. and Miss Phipps and maid have gone to Europe for a brief vacation.

—‡-‡—

Ocean Beach police the first of the week arrested two boys at Mission Beach for stealing a head light and bulbs from a parked auto at the amusement center. C. J. Chambers of 723 Santa Barbara place was the injured party. After the arrest of the suspected boys they confessed the theft and gave the names of Ed Anderson and Bill Horn, jr. A day later Jack Evans was taken in tow and proved to have been one of the trio. All lads are 16 years of age. They were sent to the detention home where Evans said he had been confined five times previously. The police are to be commended in this recovery and several are of the opinion that these boys are possibly the ones who have broken into autos that have been robbed of clothes and valuables during the past two months at Mission Beach.

Manager Killebrew of the Ideal store at 4989 Voltaire Monday reported to local police that he believed $102 in currency had been taken from his cash drawer. Later check reduced the supposed loss to $82 but now days that's quite a loss. The money was missed during business hours.

—‡-‡—

Twenty-eight scouts of troop No. 29 are enjoying a week's camp life at Laguna. Walter H. Dunn, scoutmaster, who is in charge of the camp is expecting that a number of the scouts will complete tests for first and second class rank. The troop will finish their work by Saturday of this week and are scheduled to return to the beach in the evening of the same day.

POINT LOMA TROOP No. 2 GIRL SCOUTS OF AMERICA

June 28th (Thursday) the Scouts will broadcast a Girl Scout ceremony over KGB between 3:45 and 4 p. m. Tune in at 3:45.

Jackalee Grant of Point Loma No. 2 will be invested with her second class badge and Frances Olsen of Alice Birney troop with her Tenderfoot pin during this broadcast.

The music is under the direction of Mrs. Clyde Walters. The following girls are in the cast: Grace Oliver, Jackalee Grant, Addie Evelyn Fish, Julia Kelley, Otila Shields, Martha Sterne, Phyllis Cook, Dorothy Gage.

Beatrice L. Fish will be in charge of Second class work during summer troop at headquarters. The following First class girls will assist her: Grace Oliver, Julia Kelly, Otila Shields, Addie E. Fish.

"WALTZ TIME" OPENING AT ORPHEUM FRIDAY

Gaining the acclaim of all San Diego for his forward step in bringing the only combined stage and screen presentation to be offered here, Harry L. Hartman, veteran showman, has announced a policy of two complete changes of program weekly for the Orpheum theatre, which opened its doors to capacity crowds last Friday night. Program changes will be made each week on Tuesdays and Fridays.

Featured on the program which will open for 4 days on Friday, will be the screen production of the German operetta, "Waltz Time" which has met with splendid success throughout the east. With music from the pen of Johann Strauss. The operetta will feature the international star Evelyn Laye. A premier news reel, a screen novelty, a cartoon and a two reel comedy will complete the screen attraction.

On the stage, Ted Mack, that premier master of ceremonies, who in one week's time has won for himself a warm spot in the hearts of the patrons, and his band have been retained by popular demand.—adv.

OHIO SOCIETY

A carload of fun in "Captivity" is to be released on Ohio night Friday, June 22, in the main ball room of the Elks' Club, in true eastern style demonstrating the hospitality that is characteristic of the "Buckeye State."

All Ohioans are to wear a carnation (Ohio's emblem) as a signal to former Ohioans, strangers and tourists in the city, in extending the glad hand to all home folks, inviting them to join in the fun. Prizes for cards.

The society's orchestra leader, Emilio Perry assisted by Miss Jean Kelly, the group's youngest member, will start the fun promptly at 8 p. m.

Annual "Ohio Picnic" will be held at Mission Beach the second Sunday in August.

GRUBER'S
Strand Theatre
OCEAN BEACH, CALIF.

Two Major Features
SHOW STARTS AT 7 P. M.
SATURDAY MATINEE AT 2 P. M.

FRI & SAT JUNE 22-23
"THE NINTH GUEST"
With Donald Cook, Genevieve Tobin and Hardie Albright.
"HELL BENT FOR LOVE"
With Tim McCoy and Lillian Bond. A thrill and action. Wolf Dog chapter 4. Cartoon and News weekly.

AMERICANA

BY ELLSWORTH F. WHALEN

Does our happiness increase with education? Unfortunately for us, education points out the way to real happiness but we are too lazy to make ourselves happy and cheerful. Good health is essential to a happy life. We all know that to really enjoy life we should sleep at least eight hours every night, eat good solid foods, read decent books, have a definite hobby, know and live up to the Ten Commandments and utilize the education we possess irrespective of its size or scope. Most of us are content to struggle through life just for the privilege of eating, sleeping and working. However, it is better to live a common mediocre life than one parallel to George Eastman, the millionaire kodak manufacturer. Eastman killed himself because in his estimation he had accomplished all that was in his realm of power and therefore to live any longer was tiresome and foolish.

* * *

World news is dull. We hear nothing of Admiral Byrd at the Little America base. There seems to be little news concerning new inventions, constructive economic developments, or new explorations. It is as though the world is going through a lull before a storm. At least one storm of a political nature will be hitting California soon. Sinclair advocates a pension of $50.00 per month for people of California 60 years or more old. George Creel, another Democratic candidate for California's governorship, might be able to take the measure of Upton Sinclair by promising $100.00 per month to those over 60 years of age. Excessive and false promises plus the hope of office through Roosevelt popularity on the part of numerous Democratic political candidates is making this writer more favorable to the conservative Republican party. Whether we are Republican or Democrat, we should always forget party affiliations in preference to electing the best people obtainable to public office.

* * *

There are but a little more than 200 licensed glider pilots in the United States today. Germany has over 250,000 glider pilots. Boys 16 years old or more should have the opportunity to master the art of glider flight. Gliding is not dangerous when under the supervision of competen instructors. Every town and large city in the United States should have its own glider clubs where members can get together and enjoy a good clean and novel sport. It seems to this writer that the Y. M. C. A. institutions throughout the United States could find some method of making glider flight training available to America's air-minded youth.

* * *

Its not such a bad country to live in after all, even if a lot of political agitators would have us believe the United States and all her people are headed pell-mell for certain destruction. Those who are constantly cursing the nation seem satisfied to stay in the "rotten place" and evidently have no intentions of leaving. After all, paved streets, plenty of automobiles, good houses, and excellent sanitary conditions must have something to do with these dissatisfied people remaining within our country. Few dogs would bite their master's hand that feeds them. Perhaps even we humble humans could learn something in the way of appreciation from man's fond beast, the dog.

* * *

The writer has an idea he would like to ride a horse. But perhaps it will be an idea and thats all. But why shouldn't I be able to ride a horse? If little children can ride them safely why I should be able to also. However, we all manufacture strange fears in our mind and wonder why. I don't think the horse would hurt me and I certainly wouldn't hurt the horse, so perhaps I will mount one of the critters and tell him to gallop. Then what? You know I've never ridden a horse in my life and its OK as long as the horse don't ride me. If I should be thrown off the horse I'll probably be nonchalant and light a Muriad.
